Bluetooth(™) Technology That Goes The Distance

Looking for a quality but cost-effective Bluetooth(™) enabled mouse for your computer or notebook?

The new CP-BT415 is a new generation, Bluetooth(™) enabled wireless mouse using the new low-power, Bluetooth(™) version 3.0 chipset which warrants both low power usage together with a more robust, low latency wire-free connection up to around 10 metres.

Ideal for Bluetooth(™) enabled Windows(™), Apple(™), Linux(™) and other compatible computers, no drivers are needed - just pair the device and your ready to go.

Accurate, optical tracking is of course standard with a selectable resolution of up to 1600DPI, ideal for general gaming as well as business and educational applications. 6 on-board individual buttons and scroll-wheel are featured so that you have full control of your applications at all times.

Advanced features:

Bluetooth(™) Version 3.0 low power wireless

Latency-free, robust connection - up to 10 metres

Optical tracking, DPI selectable 600/1200/1600

Superior comfort for left or right handed users

6 on-board buttons and scroll-wheel for total control

Ideal for Windows(™), Mac(™), Android(™) and more

* Bluetooth(™) computer required
