

E-screwdriver speedE® Industrial

E-screwdriver speedE® Industrial

- **Increases your speed** Twice as fast thanks to a 3-step process.
- **Protects your material** Electric fastening with a protective function to prevent damage to materials (max. 0.4 Nm).
- **Increases your control** Fixing by hand with full sensitivity.
- **Maximum freedom of choice** Open system with a rechargeable standard battery.

Application: The speedE® Industrial is ideally suited for fastening tasks in the manufacturing and cutting tool industry - wherever metric threads are used.

If, for example, screws are used in plastic or wood, the speedE® cannot fully exploit its advantages - the torque that has been optimized for material protection is too low for such applications.

Target group: Mechanics and cutting tool industry

Set content: 1x speedE® Industrial, 1x Akku, 1x TORX T20 Bit, 1x Bitholder für speedE® Industrial, 1x USB charger
