Features

- The VR CAM camera is a panoramic equipment designed to provide optimal surveillance coverage for both homes and businesses.

- The IP cameras are connected to the local network via cable or wireless over Wi-Fi. Access is done over the network by any computer, allowing you to view and record the images with perfect quality thanks to the digital video system. To monitor remotely, just have an internet connection at the installation site and a configured router.

- Equipped with a 360 ° overview, the camera is perfect for monitoring large spaces such as sales floors, warehouses, offices, small shops, buses, and other vulnerable areas such as showrooms, living rooms, master bedrooms, and a lot more.
