

Bit-Box 15 Impaktor PZ, PZ 2 x 25 mm, 15 pieces

Bits for Pozidriv Screws

EAN:	4013288187901	Size:	75x68x20 mm
Part number:	05057763001	Weight:	94 g
Article number:	Bit-Box 15 Impaktor PZ	Country of origin:	CZ
		Customs tariff number:	82079030

- Impaktor technology for above-average service life
- Particularly suitable for use with customary impact drivers
- Diamond coating for a secure fit in the screw, literally bites into the screwhead to prevent cam-out
- Take it easy tool finder: colour coding according to profile and size
- In practical Bit-Box for simple removal

High quality bits for Phillips screws in a practical Bit-Box. The Impaktor technology ensures above-average service life even under very demanding circumstances. The enhanced friction resistance from the rough diamond-particle coating on the tip of the bit prevents any slipping out of the screw head. Particularly suitable for use with customary impact drivers; 1/4" hex, appropriate for holders as per DIN ISO 1173-D 6.3. Come with "Take it easy" Toolfinder: colour coding according to profile and size stamp.

Bits for Pozidriv Screws

Bit-Box

Impaktor technology for an above-average service life even under extreme demands

The slide switch allows a simple and gradual removal and reinsertion of the bits. The transparent reverse side means that it is easy to know how many bits are still in the box.

Impaktor-Bits

For an above-average service life. Maximum utilisation of the material properties, a very special geometry – designed particularly to meet the extreme demands – as well a specific manufacturing process mean that Wera Impaktor tools have an above-average service life. Another product advantage is the coating of the Impaktor bits with minute diamond particles. These diamond particles reduce the cam-out effects – particularly high in power tool applications – which can lead to a slipping out of the screw head. The diamond particles literally bite themselves into the screw recess. This means that less contact pressure is required, something that greatly delays fatigue setting-in in power tool screwdriving jobs.

Improved productivity

For use with impact screwdrivers. Improve productivity when screwdriving with power tools.

Bits for Pozidriv Screws

Above-average service life

Maximum utilisation of the material properties, a very special geometry – designed particularly to meet the extreme demands – as well as a specific manufacturing process mean that Wera Impaktor tools have an above-average service life.

Reduced danger of bit breakage.

Particularly high strength. Reduce the danger of premature bit breakage.

Torsion zone

Torsion zone specially designed to absorb such forces and thereby protect the bit tip.

Reduced contact pressure

These diamond particles reduce the cam-out effects – particularly high in power tool applications – which can lead to a slipping out of the screw head. The diamond particles literally bite themselves into the screw recess. This means that less contact pressure is required, something that greatly delays fatigue setting-in in power tool screwdriving jobs.
