CAB-SHELF-TELE-FE-1000

Sliding Rack & Cabinet Vented Shelf

Quality Accessory Solutions For Cabinets

Looking to add a robust and quality made telescopic vented shelf to your LMS Data or compatible data cabinet or enclosure?

The new **CAB-SHELF-TELE-FE-1000** is a heavy-duty, all alloy constructed sliding shelf using the standard 19-inch width form factor. Ideal for deploying low weight equipment within the rack such as modems, UPS and other networking or server products that cannot be rack mounted the normal way.

Featuring a high count of vented slots to help mitigate cabinet 'hotspots' and with a smooth, easy-glide telescopic system with extension stop point.

With a load capacity of around 25Kg (approx) the shelf is designed for LMS Data 1000mm deep cabinets including the EcoNet Server range of cabinets.

enclosures - power distribution - cabling

specifications:

Robust, quality alloy sliding shelf for LMS Data 1000mm Cabinets

1U design with built-in vented slots to prevent 'hot spots'

Smooth sliding design with 19" wide alloy slide points

Approx shelf loading of 25Kg (nominal)

Powder-coated black finish

Ideal for non-rack-mountable equipment for the cabinet
