

01-Oct-2019

PCN #:P-19-018012

**Subject:**V23540X7000Y10=GET-FEM TERM AU

**Description of Change:** TE will replace the gold flash identification stripe on the tin-shunted GET gold version 1393364-1 and 1393365-1 with a physical "G" stamp on the bottom of the receptacle box. In addition, the "G" stamp will be added to the gold-shunted version 1393364-2 and 1393365-2 to facilitate common identification for all gold GET receptacle versions. There is no change to raw material composition nor will electrical, mechanical, and environmental performance be affected. This is a non-functional change.

**Reason:** Product improvement. The North America Automotive Division of TE is expanding use of physical identification marks in an effort to drive consistency in product identification methodology. The GET receptacle silver plated family currently uses an "S" stamp to differentiate silver from tin plated versions. The "G" stamp will differentiate the tin and silver receptacles from gold versions of the GET receptacle family.

**Key Dates:**

**Product Affected**

1393364-1

(Alias Part Numbers:

"V23540X7000Y 10"

"V23540X7000Y10")

1393365-1

(Alias Part Numbers:

"V23540X7000Y 20"

"V23540X7000Y20")

1393364-2

1393365-2

The dates on the product change notification (PCN) are best estimate dates determined at the time of issuance. Actual implementation dates may vary from such dates.

The change described in the PCN can be withdrawn, without notice, for any or all of the products identified on the PCN.

TE Connectivity corporate policy is for PCNs to be valid for 60 days and obsolescence notices to be valid for 180 days after date of issue.

For confirmation or additional information on the change, please contact the TE Connectivity Product Information Center at 800-522-6752 or your TE Connectivity Sales Representative.
