## Processing Trays

Processing trays manufactured from thick polypropylene to make them strong and crack-resistant, and are available both singularly in different sizes and colours and in sets. The sets comprise of three trays each in different colours (red, white and grey) to enable them to be easily identified in darkroom conditions.

### Features:-

- Base ribs ensure a clear flow of chemicals and give rigidity to the trays
- Available in three different colours to differentiate between chemicals under safelight conditions.
- Drip free lip for drip free emptying.
- Suitable for a wide range of PCB processing chemicals
- Moulding along one edge give support to a thermometer facilitating a constant check of solution temperature during processing
- Grooved bottom for easy item removal.
- Constructed from injection moulded chemically resistant plastic.

### Available tray sizes:-

- 5" x 7" (13cm x 18cm)
- 8" x 10" (20.3cm x 25.4cm)
- 10" x 12" (25.4cm x 30.5cm)
- 12" x 16" (30.5cm x 40.6cm)
- 16" x 20" (40.6cm x 50.8cm)
- 20" x 24" (50.8cm x 60cm)
