

INTERCEPTOR

MECHANICAL GAMING KEYBOARD

CND-SKB8

Canyon Interceptor Gaming keyboard has sharp mechanical keys that ensure awesome feeling and great control over the game. The 4-mm key route and 2-mm trigger actuation ensure great response, while the buttons themselves can handle over 60 millions of strokes. 100% anti-ghosting and anti-jamming feature NKRO as well as "Windows/Start" button lock ensures interruption-free gaming sessions. The most remarkable feature of this keyboard is its backlighting scheme. It has 21 different types of lighting including 3 types of side-light. We've created 6 pre-programmed combinations of lighting setup for a selection of most popular games. You can re-program each of these combinations according to your personal needs. Given everything described above, this keyboard is a great tool for any battle you might face.
