

## Break Out Box

STS-SJB / STS-SJB-RJ

Our Break Out Box is used in addition or as a replacement to the staff unit. The box silences loudspeaker noise and allows staff to hear clearly through headsets. This product is a must have for busy ticket booths or service-points where ambient noise conditions are high.

A version with an RJ11 socket is available. This is for connection to the Sennheiser SC 230 and SC 260 headsets, using the Sennheiser CSTD 08 connection cable for easy setup.

### Features

- Push button mute switch
- Headset and handset connection
- Compact
- Easy to install
- Version with RJ11 connection available

### Applications

For use where one to one communication takes place at a counter, booth or desk in combination with a Contacta speech transfer system:

- Banks
- Post Offices
- Ticket Offices
- Information Centres
- Airports
