

E5_C TEMPERATURE CONTROLLER

High performance with simplicity

» Easy set-up and operation

» High-contrast display

» DIN-Track mounting type joined the lineup

The new standard in temperature control...

Omron has been an active innovator in temperature control since introducing its first temperature controller in 1967. Now temperature control has taken a giant leap forward with Omron's next generation of controllers – the E5_C, which set new global standards in the crucial areas of precision, user friendliness and control performance. The E5_C series will save you time and effort in set-up and operation, while enabling faster and more accurate monitoring/control of your process. The high-visibility display of the new series is also extremely easy to read and virtually eliminates any possibility for human error.

Key features

- High-contrast, white LCD display visible from large distances and from any angle
- Easy to set up, and operate intuitively via CX-Thermo without power supply
- 50 ms sampling period for fast and precise regulation
- Functions for diagnosis for secure operations (see note 1)
- Useful timer and logic operation functions eliminating the need of a PLC

NEW GENERATION

Note 1: Alarm for loop break or PV change rate, heater burnout or sensor burnout detection

...is higher in every respect

Clearer LCD display

The large, high-contrast, white LCD display contributes to the exceptional clarity and therefore readability of the E5_C series. The display can be read unambiguously from greater distances and from much wider viewing angles than normal.

Easy set-up and operation

Coupled with the autotuning algorithms, which greatly reduce set-up and commissioning time, Omron's CX-Thermo support software has been specially developed for use with the E5_C series. This enables faster parameter set-up, easier device adjustment and simpler maintenance.

Unique performance

Although intrinsic high sampling speed and high precision are built into the E5_C series, Omron's 2-PID control is a key factor behind the advantage it offers over standard controllers. Using a powerful algorithm, it makes all the difference to control stability and thus the quality of your products.

High-contrast display

White LCD offers the greatest contrast to the black instrumentation backgrounds found in panels and the lighting conditions found in most control rooms. Despite the compact dimensions of the E5_C series, the use of white LCD technology means that the 15-25 mm display height gives maximum clarity for its size. The distance and viewing angle of the high-contrast, white LCD light display is also far less critical for viewers, ensuring correct readings every time.*

* Excluding E5DC

The white LCD display is easy to read in the subdued lighting conditions found in most control rooms.

The display remains easy to read even from wide viewing angles.

Save space!

The compact and space-saving design of the new E5_C controller generation requires less panel depth (60 mm), allowing quick snap-mounting and easy installation even under very cramped conditions.

Thanks to the IP66 protection of the front cover, the E5_C can withstand humid environments and also be cleaned with non-aggressive fluids.*

* Excluding E5DC

Easy to connect, set-up and operate

The E5_C series is extremely easy to connect, set-up and operate in just a few simple steps using the instrument's five front keys. Omron's CX-Thermo software and new navigation assistant for intuitive settings offers the fastest possible parameter setting, easier device adjustment and simpler maintenance.

Ready to operate in only three steps:

1 Connect – no extra wiring necessary*

2 Navigate and set-up

3 Operate

* CX-Thermo V4.6 must be preinstalled. It is available as a bundle together with USB converter E58-CIFQ2 and E58-CIFQ2-E

Time-saving 'shift key' for changing the set value

Key assignment can be changed for RUN/STOP or AT execution/STOP according to the user's setting!

The New E5DC with DIN-Track Mounting Capability Joins the E5_C Series, Next-generation Temperature Controllers. The E5DC Inherits the Features of the E5_C Series.

- Provides the unified design, operability, and functions of the E5_C Series.
- Setup Tool Port on the front panel.
- Width of 22.5 mm and mounts to DIN Track.
- On-panel mounting is also possible. (Mounting Adapter required; sold separately.)

E5DC

Life size

Removable Terminal Block for Easy Mounting and Replacement.

Removing from the Terminal Block
The image is for illustration purpose only.

* Hooks must be pressed to remove from the terminal block.

Even Though the E5DC Mounts to DIN Track, the Same Displays and Same Settings as the Rest of the E5_C Series Make It Just as Easy to Use

You can make the following settings with the front-panel display and keys on the E5DC to reduce the workload:

- Settings during machine commissioning
- Easy confirmation of display:settings /process temperature when designing or evaluating machines
- Confirmation of settings when troubleshooting

< Previous In-panel Temperature Controllers >

< E5DC >

Contributes to Machine Downsizing

The E5DC is only 22.5 mm wide and enables to install multi channel controls in limited space.

Previously

E5DC
Requires only half the space.

The E5DC has a short body of only 85 mm in depth for easy mounting in control panels with 120-mm depths.

Previously

E5DC
Requires only 85 mm of depth.

Unique performance with simplicity...

...and more control functionality

With key features like simplicity in operation, Omron's patented PID control, 50ms sampling period and the ability to handle multi-functional input and output types, the E5_C sets a new standard in fast and precise temperature regulation. It has all the familiar functionality available from existing Omron temperature controllers to cover virtually any general-purpose demand. And naturally, the versatile E5_C series is available with input/output combinations to perfectly match all of your requirements.

Extended inputs & outputs

- Remote SP input
- Transfer output (voltage 1-5 V output) added
- Event input
- Auxiliary output

New feature

- Program-less communication
- Position-proportional control

Global availability, support and network

Providing you with the support you need to operate globally

Whether you want to take your existing products into new industrial sectors, or whether you want to expand your business into entirely new geographical markets, Omron can help. We aim to offer the same level of support globally, without forgetting local needs.

We have production facilities on every continent.

Our smart communications network and seamless global support means we can provide you with parts and technical support wherever you sell your machines. And all of our components comply with major international standards, to ensure problem-free integration. It's all there for you.

Facts and figures

- Over 35,000 employees
- Almost 200 locations
- Presence in every continent
- Knowledge-sharing through our global infrastructure
- Local R&D facilities synchronised to local needs
- Local factories to ensure quick response
- Global pricing terms
- Global support

High performance & simplicity

The next generation E5_C temperature controller is setting a new global standard in terms of precision and user-friendly design. Best control performance, easy set-up and outstanding visibility of the white IP66 LCD display have been integrated into a space-saving housing with only 60 mm of depth.

- Fast and precise regulation: 50ms sampling loop period time
- Easy to set up, and operate intuitively via CX-Thermo without power supply
- Best contrast display using white LCD technology which is visible from a far distance and from any angle
- Useful alarm and diagnosis functions for secure operation

Specifications

	E5CC	E5EC	E5AC
Power supply voltage	A in model number: 100 to 240 VAC, 50/60 Hz D in model number: 24 VAC, 50/60 Hz; 24 VDC		
Operating voltage range	85% to 110% of rated supply voltage		
Power consumption	6.5 VA max. at 100 to 240 VAC, and 4.1 VA max. at 24 VAC or 2.3 W max. at 24 VDC	8.3 VA max. at 100 to 240 VAC, and 5.5 VA max. at 24 VAC or 3.2 W max. at 24 VDC	9.0 VA max. at 100 to 240 VAC, and 5.6 VA max. at 24 VAC or 3.4 W max. at 24 VDC
Sensor input	<ul style="list-style-type: none"> – Temperature input Thermocouple: K, J, T, E, L, U, N, R, S, B, W, or PL II Platinum resistance thermometer: Pt100 or JPt100 Infrared temperature sensor (ES1B): 10 to 70°C, 60 to 120°C, 115 to 165°C, or 140 to 260°C – Analog input Current input (mA): 4 to 20 or 0 to 20 Voltage input (V): 1 to 5, 0 to 5, or 0 to 10 		
Input impedance	Current input: 150 Ω max., Voltage input: 1 Ω M min. (Use a 1:1 connection when connecting the ES2-HB/THB.)		
Control method	ON/OFF control or 2-PID control (with auto-tuning)		
Indication accuracy	Thermocouple input: (±0.3% of PV or ±1°C, whichever is greater) ±1 digit max. Platinum resistance thermometer input: (±0.2% of PV or ±0.8°C, whichever is greater) ±1 digit max. Analog input: ±0.2% FS ±1 digit max. CT input: ±5% FS ±1 digit max.	Thermocouple input: (±0.3% of PV or ±1°C, whichever is greater) ±1 digit max. Platinum resistance thermometer input: (±0.2% of PV or ±0.8°C, whichever is greater) ±1 digit max. Analog input: ±0.2% FS ±1 digit max. CT input: ±5% FS ±1 digit max.	
Auto-Tuning	Yes, 40%/100% MV output limit selection. When using Heat/Cool: Automatic cool gain adjustment		
Self-Tuning	Yes		
Control outputs	Relay output	SPST-NO, 250 VAC, 3 A (resistive load), electrical life: 100,000 operations, minimum applicable load: 5 V, 10 mA	SPST-NO, 250 VAC, 5 A (resistive load), electrical life: 100,000 operations, minimum applicable load: 5 V, 10 mA
	Voltage output (for driving SSR)	Output voltage: 12 VDC ±20% (PNP), max. load current: 21 mA, with short-circuit protection circuit	Output voltage: 12 VDC ±20% (PNP), max. load current: 40 mA, with short-circuit protection circuit (The maximum load current is 21 mA for models with two control outputs.)
	Linear current output	4 to 20 mA DC/0 to 20 mA DC, load: 500 Ω max., resolution: approx. 10,000	
Auxiliary outputs	Number of outputs	3	4
	Output specifications	SPST-NO relay outputs, 250 VAC, Models with 3 outputs: 2 A (resistive load), electrical life: 100,000 operations, minimum applicable load: 5 V, 10 mA	SPST-NO relay outputs, 250 VAC, Models with 4 outputs: 2 A (resistive load), electrical life: 100,000 operations, minimum applicable load: 5 V, 10 mA
Event inputs	Number of inputs	2 or 4 or 6 max (depends on the model)	
	External contact input specifications	Contact input: ON: 1 k Ω max., OFF: 100 k Ω min. Non-contact input: ON: Residual voltage: 1.5 V max., OFF: Leakage current: 0.1 mA max. Current flow: Approx. 7 mA per contact	
Setting method	Digital setting using front panel keys or via Remote Software CX-Thermo V4.5		
Indication method	11-segment digital display and individual indicators		
Multi SP	Up to eight set points (SP0 to SP7) can be saved and selected using event inputs, key operations, or serial communications.		
Other functions	Manual output, heating/cooling control, loop burnout alarm, SP ramp, other alarm functions, heater burnout detection (including SSR failure detection), 40% AT, 100% AT, MV limiter, input digital filter, self-tuning, temperature input shift, run/stop, protection functions, extraction of square root, MV change rate limit, logic operations, PV/SV status display, simple programming, automatic cooling coefficient adjustment		
Ambient operating temperature	–10 to 55°C (with no condensation or icing)		
Ambient operating humidity	25% to 85%		
Storage temperature	–25 to 65°C (with no condensation or icing)		
Degree of protection	Front panel: IP66, Rear case: IP20, Terminals: IP00		
Sampling period	50 ms		
Size in mm (HxWxD)	48x48x64	48x96x64	96x96x64

High performance & DIN-Track Mounting

The next generation E5_C temperature controller is setting a new global standard in terms of precision and user-friendly design. Best control performance, easy set-up and outstanding visibility of the white LCD display have been integrated into a space-saving housing with only 22.5mm wide.

- Fast and precise regulation: 50ms sampling loop period time
- Easy to set up, and operate intuitively via CX-Thermo without power supply
- Removable terminal block for easy mounting and replacement.
- Useful alarm and diagnosis functions for secure operation

Specifications
