## Serial Communications

The book covers:
- PIC micro Serial Communications
- Asynchronous/Synchronous Serial Communications
- ASCII character code
- The RS232 standard
- Bit Bang Asynchronous Comms
- I²C serial bus
- SPI serial bus
- Microwire serial interface
- Maxim-Dallas 1-wire interface

This is the fourth title in the series written by Roger Stevens, featuring PIC microcontrollers. The book shows comprehensive methods for implementing serial communications between PICs and external devices.
