

description:

The Teletest PC is designed for comprehensive testing or full servicing of personal computer monitors. The unit is hand held and battery powered for ease of use in the workshop or field. Digitally controlled and generated it just plugs straight into the monitor cable with low cost as it provides only the essential patterns, syncs and outputs that today's technician is likely to need when servicing the most popular PC monitors..

details:

- VGA Synchronisation: 640x480 Lines, 31.5kHz, 60Hz
- S-VGA Synchronisation: 800x600 Lines, 32.5kHz, 56Hz
- Sync inverter switch
- Computer test patterns:
 - Colour bars 100%
 - Grey scale bars
 - Crosshatch
 - Red purity
 - White purity
 - Black (sync only)
 - Dots
 - Frequency burst

technical information:

Technical Data	-
Sync Outputs	Horizontal TTI 10KOhm Vertical TTL 10KOhm
Video Outputs	Red, analogue 1Vp-p 75Ohm Green, analogue 1Vp-p 75Ohm Blue, analogue 1Vp-p 75Ohm
Monitor Connector	High Density 15 W D-Type Socket
Power	9V PP3 or 9-12V dc Mains Adapter
Dimensions (LxWxH)	80x35x140mm
Weight	250gms
