

## N3181 ZigZag Lamp

Rechargeable task light, which folds down flat and is perfect for use when travelling because it fits in a pocket or bag.

The single, touch sensitive button turns the light on and off, with this portable lamp displaying the colour of daylight. The lamp also has three brightness settings ensuring that it displays the right colour of light. This portable travel lamp recharges using the mini USB which is supplied and can be plugged into a computer or plug.

This light is suitable for people with low vision due to its ease of use and tactile design. It provides up to eight hours of bright white light, clearly illuminating the space in front of it.

**SKU:** N3181
