

HIGH EFFICIENCY - LOW VOLUME - HIGH POWER - LOW WEIGHT

COLDCUBE® types CC001 and CC002 are standard components, readily available to help the engineer reconcile the conflicting requirements of higher performance from ever diminishing volume.

COLDCUBE® is designed to fit within standard U2 racking systems.

COLDCUBE® type CC001 is designed to provide maximum efficiency with two 80mm square fans in a push-pull configuration. Type CC002 will operate at the performance shown with only one fan.

COLDCUBE® performance data based on Comair Rotron Sprint or Papst type 8314 fans.

Catalog Number	dim'n A	dim'n B	dim'n C	dim'n D	Weight (Kg)	Thermal Resistance
CC001	75.0	71.5	82.0	100.0	0.64	0.12° C/Watt
CC002	75.0	71.5	82.0	60.0	0.38	0.18° C/Watt

Self adhesive foam gaskets are available as an alternative to screw fixing for attaching 80mm square fans to the heat sinks.
