

CONNECTCORE® 6UL DEVELOPMENT KIT

Design and build your connected products on an industrial and productization-ready Single Board Computer platform

The ConnectCore 6UL Development Kit delivers a complete off-the-shelf Single Board Computer (SBC) built on the ConnectCore 6UL System-on-Module (SOM).

The SBC is a proven reference design for ConnectCore 6UL module-based development, suited for rapid prototyping; as a productization-ready product platform, it requires little to no hardware development effort. Its standard form factor is the ideal solution for connected applications demanding professional reliability and flexibility in medical/healthcare, transportation, energy, utility, agriculture, building automation and industrial markets.

FOCUS ON YOUR CORE COMPETENCY.

The SBC is built on the ConnectCore 6UL SOM with a low-power NXP i.MX6UL application processor, 256 MB flash, 256 MB RAM, dual 10/100 Mbit Ethernet, pre-certified dual-band 802.11ac wireless LAN, Bluetooth® 5 connectivity, NFC tag capabilities, and complete set of available peripherals.

Digi tests, integrates and maintains complete Yocto Project Linux BSP and software support for the ConnectCore 6UL module and SBC platform. This includes software components such as the Digi TrustFence® Device Security Framework, wireless connectivity stacks, and drivers for relevant industry leading cellular modems. We also offer optional services, including antenna design/selection guidance, cellular integration support, certification assistance, or custom design services, to get you to market faster and smarter.
