

Adhesive Technologies

LOCTITE UK 1351 B25

Known as MACROPLAST UK 1351 B25

Features and Benefits

☐ Add to comparison

2-part polyurethane adhesive. Good strength and stiffness. Approved for wind farm applications. Other potlife variations available on request.

LOCTITE® UK 1351 B25 is a 2-part, sag-resistant polyurethane adhesive with high strength (20 N/mm² tensile strength) and stiffness, along with good compression strength. The product offers good gap filling capabilities (up to 15 mm) and is certified by Germanischer Lloyd for bonding in wind power applications. It is non-abrasive and no tempering is required. Other potlife variations are available on request.
