

May 2020

Valued Customer,

nVent SCHROFF has been informed by our supplier, that the current tray handle used in Comptec enclosures in RAL 7016 do not meet the material specification according to UL 94 V0 (fire behavior of plastics). The handles are used for enclosures in the heights 6, 7, 9 and 12U (Please see list on next page).

**What is different?**

The currently used handles only comply with the material specification according to UL 94HB. This means that the plastic handle does not extinguish itself in the event of fire. The new material will meet to the UL 94 V0 specification and would extinguish in less than 10 seconds.

**What is changing?**

We will now replace the handle in RAL 7016 (anthracite) by a shell handle in RAL 9005 (black) on all Comptec enclosures. This handle complies with the material specification UL 94 V0. The color change will be visible, but the change ensures that the shell handle meets the material requirement (UL 94 V0).

To identify the new version, look on the rear side of an unassembled handle for the following printed label:

**When will this change be available?**

The internal change is in progress. The first new tray handles will start shipping by the end of June 2020. Last time buys for handles in the RAL7016 are available while supplies last.

Part Number	Description	Height (U)	Depth in mm
60229004	Tray handle, Size 1 (56mm x 110mm)	-	-
60229004	Tray handle, Size 2 (22mm x 80mm)	-	-
