

The old version of the WAGO 2060 Series is being discontinued and replaced by newer parts.

Here are the details:

WAGO products are subject to a long life cycle. New variants/types and articles are continuously being developed, completing and optimising the existing product range. However, the life cycle of each product is not endless, and we herewith would like to inform you that certain items of WAGO 2060 Series will be discontinued in the foreseeable future.

Concerned product:

All SMD and THR PCB Terminal Blocks 2060 Series with short housing and corresponding Board-to-Board Links. The affected article numbers are shown below.

Last-Call-Date:

30.11.2020 has been foreseen as the last call date for the mentioned product. The last call date is the latest order date where you can order the items without restrictions. This is the last time that we can/will confirm the delivery of the items to be discontinued. After the last call date no further order can/will be processed any more.

Last delivery date:

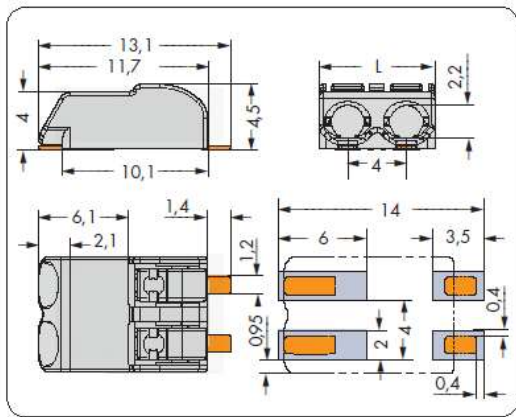

31.05.2021 has been defined as last delivery date. This means that up to this date the orders which were received until the last call date will be delivered.

Alternative option:

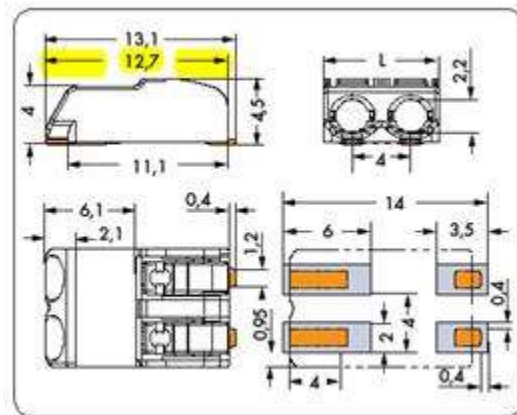

There are successor products available for all discontinued terminal blocks. These products have a housing which is 1mm longer at the back for higher mechanical stability. They can be used without further consideration if there are no other objects placed in that area (see drawing below). The PCB layout as well as technical data and certifications are identical.

We are informing you about the planned product discontinuation process at this early stage to provide you with the possibility to apply WAGO alternatives – and therefore we explicitly offer you the support of our field service.

Would you please consider the deadlines and please do not hesitate to contact us in case of any questions.

With Best Regards,

WAGO Limited
