

TEROSON VR 1000

Known as Double-Sided Adhesive Tape

Features and Benefits

Add to comparison

Body Repair – Bonding: polyethylene foam with acrylic adhesive, weather-resistant. TEROSON® VR 1000 is a polyethylene foam tape coated on both sides with acrylic adhesive. One side is covered with a polyethylene film as a separating medium. It is used in particular for bonding and attachment of protective and decorative trims or insignias and fixing of PVC or PU integral skin foam panels. The tape is characterized by a high resistance to weathering and UV. Surface preparation with TEROSON® VR 10 recommended.
