ESD labels and tape

EN 61340-5 requires all electrostatic discharge sensitive devices and assemblies to be labelled with the 'susceptibility' symbol shown below. It stipulates that ESD protective packaging be labelled with the 'protection' symbol. We offer self-adhesive paper labels with either symbol in several sizes.

The best known ESD cautionary symbol consists of a yellow hand in the act of reaching, deleted by a bar, all within a black triangle. It is intended to identify devices and assemblies that are susceptible to ESD. It is now correctly used as follows:

- on individual components and related documents to state: "this device is static sensitive: do not touch without appropriate precautions"
- on assemblies and related documents to state "includes static sensitive components: take appropriate precautions"
- as part of a sign identifying an area where sensitive devices are handled, to warn all who approach it that precautions are required.

Susceptibility

Protection

The 'protection' symbol should appear on ESD protective products such as [shielding bags](#) and [boxes](#) as well as on portable items such as field service mats, trolleys and garments. In place of the asterisk, a letter indicating the primary function of the item may appear: [See table](#).

Clear antistatic tape

- Generates low electrostatic charge even at 20%rH, can be used in an EPA or cleanroom
- Used to seal shielding bags or boxes, or to attach labels
- Cellulose based tape with rubber-based adhesive, leaves no deposit when removed
- Clean, individually wrapped rolls, 66m long
- Transparent, blue tint, receptive to marker pen
- Rs: 109 to 1011Ω, T1000 : <2 sec at 25% rH

N.B: Items in **bold** are stock items!

Static Dissipative tape

- Self adhesive, high strength, water-proof PVC tape
- Used to seal cases in ESD protected areas
- Rs: $2 \times 10^9 \Omega$, T₁₀₀₀ < 2 sec
- Low-charging < 200V when peeled from roll
- Supplied on a roll 50mm wide, 66m long

CODE	UNIT

Static dissipative tape

K49

66m roll

Antistatic packing tape

- Does not generate electrostatic charge
- Suitable for use in an EPA
- Printed yellow with black logo and text to EN 61340-5
- Paper tape with water-based acrylic adhesive
- T1000 : <2 sec at 25% rH
- Tape width 50mm, length 66m

N.B: Items in **bold** are stock items!

Packing tape

- Suitable for sealing secondary packaging such as cartons

- Conventional PVC self adhesive yellow tape, not for use in an EPA
- Printed in black with logo and text to EN 61340-5
- Tape width 50mm, length 66m

N.B: Items in **bold** are stock items!
