

EAN:	4013288217622	Size:	0x0x0 mm
Part number:	05137811001	Weight:	0 g
Article number:	Kraftform 900/7 Set 1	Country of origin:	
		Customs tariff number:	82054000

- 7-piece set in compact, textile box with Wera 2go compatibility
- Chiseldriver for fastening, chiselling and loosening
- With pound-thru hexagon blade, impact cap and wrench aid
- Smooth hard zones for high speed turning, soft grip zones for high torque transfer
- Multi-component Kraftform handle for fast and low-fatigue working

7-piece Wera chiseldriver set for screwdriving, chiselling, mortising and slackening stuck screws. With a multi-component Kraftform handle for fast and gentle work. Kraftform Plus: Hard handle zones for high working speeds, while soft handle zones guarantee high torque transfer. With pound-thru hexagon blade made of premium bit material, thereby giving lossless power transmission even with hammer blows. Tough tempered material to prevent the blade from chipping or breaking. With integrated impact cap to increase service life and reduce risk of splintering. The Wera Black Point tip and a sophisticated hardening process guarantee a long usability of the tip, increased corrosion protection and exact fitting accuracy. With hexagon anti-roll protection to avoid bits from annoying rolling away in the workplace.

Set contents:

 	917 SPH	
	05017005001	1 x PH 1 x 80 mm
	05017010001	1 x PH 2 x 100 mm
 	932 A	
	05018262001	1 x 0,8 x 4,5 x 90 mm
	05018264001	1 x 1 x 5,5 x 100 mm
	05018266001	1 x 1,2 x 7 x 125 mm

 	977 TORX®	
	05024401001	1 x TX 20 x 90 mm
	05024402001	1 x TX 25 x 100 mm
	K240	
	11990178	1 x 240 x 50 mm

Integrated impact cap

Screwdrivers are often misused as chisels. This can be dangerous. The chiseldriver is the solution when not only screwdriving is required. For fastening, chiselling and loosening seized screws. Wera chiseldriver: the screwdriver whenever the going gets tough!

An integrated impact cap lengthens the service life and reduces the danger of splintering. Nevertheless, always wear protective goggles.

Pound-thru blade

A hexagon blade made out of high-quality bit material extends right through the handle – thereby ensuring full transfer of force, even when struck with a hammer. The ductile tempered material prevents the blade from splintering or breaking.

Integrated hex bolster

Greater torque can be transferred by fitting an open-jaw or ring spanner over the integrated hex bolster.

Wera Black Point tip

The Wera Black Point tip and a refined hardening process ensure long service life of the tip, improved corrosion protection and an exact fit.

Kraftform

The basic idea for the prototype of the Kraftform handle – that the hand should dictate the design – has, right through to today, proved to be correct. In cooperation with the internationally recognised Fraunhofer IAO Institute, Wera developed a screwdriver handle designed to match the shape of the human hand as long ago as the 1960s. After a long development phase, the Wera Kraftform handle was launched to the market in 1968. It has been optimised through the years with new technologies, but has kept its proven shape. After all, the human hand has not changed either.

Multicomponent Kraftform handle

Wera makes its Kraftform handles from several materials with different properties. The core is made from a hardwearing plastic that holds the blade securely even when subjected to great forces. The yellow soft zones of the external mantle consist of a softer material with more friction resistance for high torque transfer. The black areas with a harder surface prevent the hand from sticking to the handle enabling you to adjust your grip more quickly.

Prevents hand injuries

The outstanding design of the Kraftform handle that fits perfectly into the hand prevents hand injuries such as blisters and calluses.
