TE would like to inform you of the following change(s) to the listed TE Connectivity Product. In case of any further questions about this change(s), please contact your TE Connectivity Sales Engineer. Affected part, drawing and/or specification numbers are listed on the attached sheet(s).

General Product Description:

Laser marking process on modules DMC-M

Description of Changes

Te Evreux, FR will implement a new process for the cavity marking, and the part number marking on module DMC-M. Technical risk: referring to the declaration of design and performances DDP 732 313 VA, the technical risks have been highlighted These have been mitigated thanks to the qualification test report PVE 732-193 VA. Pending approval from certification authority

Reason for Changes:

Product improvement.Laser marking process will avoid, customer and internal quality alert issue due to current marking process. Current process is ink marking (legibility and marking erase). The marking of the cavities will be made at the end of the assembly process. It will avoid to have two part number for the grommet (rear male and rear female grommet). Laser proces avoid "wet"processes: no management of preemption dates of ink, no time waisted du to curing process.
