WSX240-1000	WSX240-1000	WSX240-1000	WSX240-1000

To Our Value Customers:

Beginning December 20, 2020, UL/IEC/EN 60950-1 standard will be superseded by UL/IEC/EN 62368. This means that the European Union (EU) will not allow product approved to IEC/EN 60950-1 to be distributed or imported into the EU. On the other hand, North American NRTL's and other national regulatory bodies will continue to accept UL 60950-1 approved product for the foreseeable future. It is expected that the adoption of IEC62368 by other national regulatory bodies will occur over the next several years. Beginning December 20, 2020, all new UL approvals will need to be made to UL62368.

The good news is that Triad's WSX power supplies have recently been updated and approved to UL/IEC/EN 62368. This updated series is intended to be a direct replacement to our existing WSX series. This means that the form, fit and function will remain the same. The part numbers we currently use will also be used on the new series to help make a seamless transition. Over the next few months, we will begin the transition from UL/IEC/EN 60950-1 to UL/IEC/EN 62368 product. UL/IEC/EN 62368 product will carry a date code of, or after, 2017, meaning the parts were manufactured week 17 of year 20 or thereafter. In addition, we will begin to include an additional input plug for China bringing the total number of plugs to 5.

If you are receiving this notification, our records indicate that you have purchased a device listed here in the past. We are now providing you the opportunity with this notification to place a LIFETIME BUY for UL/IEC/EN 60950-1 product.

Sincerely,

Lazaro Rodriguez

Engineer Manager, Standard Products Support
