

**Product Name:** Aluminum Heatsink Cooling Fan for LattePanda

### **Introduction**

Is your LattePanda running hot and throttling?

This heat sink and fan combo will cool the CPU for smooth performance.

The fan keeps the unit running at a stable temperature. The 2-Pin jumper wire makes it easily to connect with the CN2 headers on the board.

This fan is low noise and has a thermal pad on the back that can stick on the metal shield on the board. With its aluminum casing, heat from CPU will be absorbed fast, giving you better performance. This is a simple and effective way to make the LattePanda cool!

Note: Please pay attention to wire polarities

Red -> 5V

Black -> GND

### **Specification**

Operating Voltage: 5v

Operating Current: 0.14A

Rated Speed: 6500 RPM

Cable Length: 20cm

Interface Type: 2.54mm 2-Pin DuPont Female Connector

Dimension: 34.5 \* 34.5 \* 7.2 mm/1.36 \* 1.36 \* 0.28 inches

Weight: 12g

### **Shipping List**

Aluminum Case Cooling Fan            x1
