

AC500101 - High Density EERAM Evaluation Kit

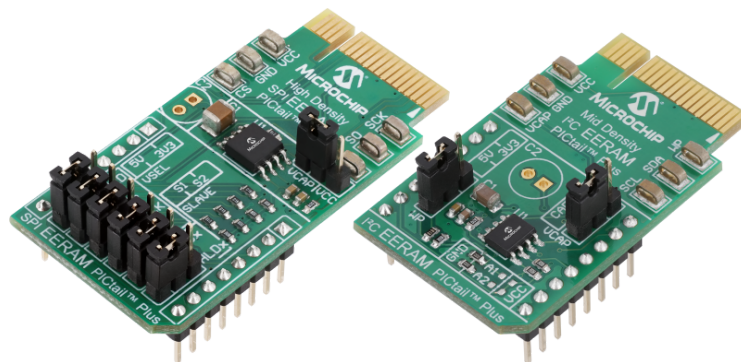

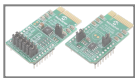

Part Number: AC500101

Summary:

The High-Density EERAM PICtail™ Kit demonstrates the features and abilities of the 48LM01 SPI and 47L64 I²C EERAM devices in standard development platforms. By designing with these daughter boards with the PICtail Plus and mikroBUS™ connectors, they will operate with the Explorer 8 Development Board, the Explorer 16/32 Development Board, and many other tools. Product Features

- 1 Mbit SPI and 64 Kbit I²C serial EERAM devices
- Follows the published recommended capacitor selection for the EERAM device
- Test points with probe loops for I²C signals, SPI signals, VCC and GND
- On-board pull-ups for I²C bus operation
- Jumper options for 3.3V and 5V operation
- On-board RC filter ensures VCC ramp rate adheres to data sheet requirements
- Jumper for VCAP/VCC operation
- Jumper for alternate I/O pins to device HOLD and CS
- PICTail™ Plus and mikroBUS™ connectors
