

## FIBERMOD – Eurostyle and 6C Angled LC Multimode Modules

Our stylish angled fibre modules have been designed for use in standard faceplates which connect to industry standard trunking, wall box or floor box installations. Providing optimum fibre bend radius control, these multimode LC to LC duplex modules are suitable for use in FTTD or FFTP environments

### **Features**

- Compatible with most “Euro style” 25x50mm and “6C” 25x38mm faceplate outlets
- Angled modules avoid issues with bend radius
- Available in white (for faceplates & trunking) and in black (for floor boxes and decorative faceplates)
- Multimode fibre female to female couplers LC/LC duplex
