

DFROBOT[®]
DRIVE THE FUTURE

Track Map

SKU:MBT0011

INTRODUCTION

This multi-functional map with a size of 120cm×90cm is specially designed for line-tracking applications. There are black lines with a width of 2cm printed on the 120g Map paper, which is high quality and not easy to damage.

The front side of this map has a figure “8” elliptical pattern that is suitable for basic robot line-tracking learning. On the backside, we designed a complex point-to-point pattern for meeting the requirements of advanced learning.

The map has a calibration area for line-tracking sensors. Users can easily calibrate [Maqueen Lite \(V4.1 and above\)](#) or [Maqueen Plus](#) on this map only by one key.

SPECIFICATION

- Size: 120cm×90cm(±2cm)
- Line track width: 2cm
- Paper specifications: 120g Copper plate paper
