

IO Extender for micro:bit (V2.0)

INTRODUCTION

This IO Extender is an easy-to-use and low-cost expansion board for micro:bit. It leads out all IO ports of micro:bit and has a specially-designed port for "HuskyLens AI camera". This board can be used to provide stable 5V power supply for HuskyLens to make it run steadily in all modes.

The silkscreens on the back clearly indicate the functions of all interfaces, which can help users to get started easily.

Note: Please supply power via the USB port on this product when using with HuskyLens.

FEATURES

- Rich ports, lead out all micro:bit pins in Gravity standard, 2-way I2C port
- Specially-designed I2C port for HuskyLens
- Clear silkscreen on the back, easy to get started.
