Blade Width: 44mm

Depth of Cut: 52mm

Blade Thickness: 0.8mm

ADDITIONAL INFORMATION

You can find this product in any SMART Assured Stockist across the UK. [Find out more.](#)

The award winning range of Purple Series SMART blades have been specifically designed to give the very best, all round, long-life cut. The 'Deep cut' blade is great for reaching further than other blades and makes it the perfect option for cutting out old windows etc! The tothing has been designed to give a very good cut in timber (what 95% of users are wanting to cut!) but this has then been coupled with a high grade Titanium coating to reduce the heat build up and protect the blade when cutting through nails, copper pipes, even screws! By protecting the blade when cutting tougher materials, the sharpness of the tooth is maintained and you are not only able to cut through tougher metal than any other Bi-Metal blade, but also continue cutting timber, clean and fast, as you have not burnt out the teeth cutting through the nails/screws! That is why we believe the Purple Series are truly the: Simply the best blade solution! (A great timber blade AND a long-life Bi-Metal blade!)

Applications

Timber with nails, Stainless steel screws, Gypsum Board, Fibreglass, Window putty, Plastics, Non-ferrous metals e.g; copper and aluminium

Smart Tips

To increase the blade life when cutting nails and steel, reduce the speed by 2 settings and move blade side to side while cutting.

**Smart Tool Group
Purple Series Blades**

The new Purple Series multi-tool blades from Smart have an advanced titanium alloy coating, giving extreme cutting capabilities and extra-long life. The multi-layered coating keeps the edge sharper for longer and drastically reduces friction, enabling higher speed cutting in not only timber and wood embedded with nails, but also with screws and small bolts.

According to the company the blades are proven to outlast other 'long-life' blades on the market by over 50 per cent, and they fit the vast majority of oscillating multi-tools currently available.
