STM32G0B1 RET6 64 PINS

- Arm® Cortex®-M0+ core at 64 MHz
- 512 Kbytes of Flash memory, 144 Kbytes of SRAM
- Two extension types:
  - ARDUINO® Uno V3 connectivity
  - ST morpho extension pin header footprints for full access to all STM32 I/Os
- Embedded ST-LINK/V2-1 debugger/programmer

By using or installing (as applicable) this evaluation kit you accept all the terms of the EVALUATION LICENCE AGREEMENT available at: www.st.com/epla

ST part number: NUCLEO-G0B1RE

www.st.com/stm32nucleo
STM32 Nucleo-64 for STM32G0B1 mainstream MCUs

GETTING STARTED

1/ Check the jumper positions on the board: CN4 (STLK) on [1-2], [3-4], JP2 (PWR) on [1-2], JP3 (IDD) on.

2/ For a correct identification of all device interfaces from the host PC, install the Nucleo USB driver available from the www.st.com/stm32nucleo webpage, prior to connecting the board.

3/ To power the board, connect the STM32 NUCLEO-G0B1RE to a PC with a USB cable Type-A to Micro-B through USB connector CN2. As a result green LED LD3 (PWR) lights up, LD1 (COM) blinks.

4/ Press user button B1 (blue).

5/ Observe that the blinking frequency of the green LED LD4 changes, by clicking on the button B1.

6/ The demo software and several software examples that allow you to use the STM32 Nucleo features are available at www.st.com/en/product/nucleo-g0b1re

SYSTEM REQUIREMENTS

- Windows® OS (7, 8 and 10), Linux® 64-bit or macOS®
- USB Type-A to USB Type-A or USB Type-C® to Micro-B cable

DEVELOPMENT TOOLCHAINS

- IAR Systems - IAR Embedded Workbench®
- Keil® - MDK-ARM®
- STMicroelectronics - STM32CubeIDE

1 On Windows® only

EMBEDDED SOFTWARE

STM32CubeG0 MCU Package featuring drivers, RTOS, file system and examples for this board.
