

What Is Multisim™?

Multisim™ is industry-standard SPICE simulation and circuit design software for analog, digital, and power electronics in education and research.

Intuitive Circuit Design With Advanced SPICE Simulation

Multisim™ software integrates industry-standard SPICE simulation with an interactive schematic environment to instantly visualize and analyze electronic circuit behavior. Its intuitive interface helps educators reinforce circuit theory and improve retention of theory throughout engineering curriculum. By adding powerful circuit simulation and analyses to the design flow, Multisim™ helps researchers and designers reduce printed circuit board (PCB) prototype iterations and save development costs.

Multisim™ Software Options

Multisim™ for Education

Multisim™ for Education is circuits teaching application software for analog, digital, and power electronics courses and laboratories.

Multisim™ for Designers

Multisim™ provides engineers the SPICE simulation, analysis, and PCB design tools to quickly iterate through designs and improve prototype performance.

Software Benefits

Standard Service Program

Every purchase includes a renewable, one-year membership to the Standard Service Program (SSP) for software. SSP membership includes the following features:

- Live phone and email technical support from local, degreed engineers
- Automatic version updates to Multisim™ and Ultiboard™ software
- 24/7 access to selected online training and virtual demonstrations
- Access to historical versions in case you need to share code with your team

Expand the Power of Multisim™ Software

Multisim Live™ delivers SPICE simulation to you anywhere, anytime. Learn electronics with an interactive, online, touch-optimized environment that works on any device. With a database of over 30,000 community circuits, you can immediately turn inspiration into simulation. Try it now for free.
