

# Safety Data Sheet according to Regulation (EC) No 1907/2006

Page 1 of 13

SDS No.: 583758

V001.3 Revision: 22.12.2017

printing date: 17.03.2021

Replaces version from: 01.03.2017

TEROSON UP 150 CAN 332G EN

# SECTION 1: Identification of the substance/mixture and of the company/undertaking

#### 1.1. Product identifier

TEROSON UP 150 CAN 332G EN

### **Contains:**

Styrene

### 1.2. Relevant identified uses of the substance or mixture and uses advised against

Intended use:

2K Filler paste

### 1.3. Details of the supplier of the safety data sheet

Henkel Ltd

Wood Lane End

HP2 4RQ Hemel Hempstead

Great Britain

Phone: +44 1442 278000 Fax-no.: +44 1442 278071

ua-productsafety.uk@henkel.com

### 1.4. Emergency telephone number

24 Hours Emergency Tel: +44 0 8701 906777 - For further general health & safety, technical and practical advice on this product, please call +44 (0) 1606 593933 or write to: Technical Services; Henkel Limited; Road 5; Winsford Industrial Estate; Winsford; Cheshire; CW7 3QY- Email: technical.services@henkel.co.uk

# **SECTION 2: Hazards identification**

### 2.1. Classification of the substance or mixture

### Classification (CLP):

Flammable liquids Category 3

H226 Flammable liquid and vapor.

Skin irritation Category 2

H315 Causes skin irritation.

Serious eye irritation Category 2

H319 Causes serious eye irritation.

Toxic to reproduction Category 2

H361d Suspected of damaging the unborn child.

Specific target organ toxicity - repeated exposure Category 1

 $H372 \quad Causes \ damage \ to \ organs \ through \ prolonged \ or \ repeated \ exposure.$ 

### 2.2. Label elements

#### Label elements (CLP):

Hazard pictogram:

Signal word: Danger

**Hazard statement:** H226 Flammable liquid and vapor.

H315 Causes skin irritation.

H319 Causes serious eye irritation.

H361d Suspected of damaging the unborn child.

H372 Causes damage to organs through prolonged or repeated exposure.

**Precautionary statement:** P260 Do not breathe dust/fume/gas/mist/vapours/spray.

**Prevention** P271 Use only outdoors or in a well-ventilated area.

P280 Wear protective gloves/protective clothing/eye protection/face protection.

**Precautionary statement:** P302+P352 IF ON SKIN: Wash with plenty of water.

**Response** P303+P361+P353 IF ON SKIN (or hair): Take off immediately all contaminated clothing.

Rinse skin with water [or shower].

P305+P351+P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove

contact lenses, if present and easy to do. Continue rinsing.

P308+P313 IF exposed or concerned: Get medical advice/attention.

**Precautionary statement:** 

Disposal

P501 Dispose of contents/container in accordance with national regulation.

#### 2.3. Other hazards

Not fulfilling Persistent, Bioaccumulative and Toxic (PBT), very Persistent and very Bioaccumulative (vPvB) criteria.

### **SECTION 3: Composition/information on ingredients**

### 3.2. Mixtures

### General chemical description:

Car-care product

#### Base substances of preparation:

Polyester

### Declaration of the ingredients according to CLP (EC) No 1272/2008:

| Hazardous components | EC Number        | content | Classification        |
|----------------------|------------------|---------|-----------------------|
| CAS-No.              | REACH-Reg No.    |         |                       |
| Styrene              | 202-851-5        | 1- 14 % | Flam. Liq. 3          |
| 100-42-5             | 01-2119457861-32 |         | H226                  |
|                      |                  |         | Acute Tox. 4          |
|                      |                  |         | H332                  |
|                      |                  |         | Asp. Tox. 1           |
|                      |                  |         | H304                  |
|                      |                  |         | Eye Irrit. 2          |
|                      |                  |         | H319                  |
|                      |                  |         | Skin Irrit. 2         |
|                      |                  |         | H315                  |
|                      |                  |         | STOT RE 1; Inhalation |
|                      |                  |         | H372                  |
|                      |                  |         | Repr. 2               |
|                      |                  |         | H361d                 |
|                      |                  |         | Aquatic Chronic 3     |
|                      |                  |         | H412                  |
|                      |                  |         | STOT SE 3             |
|                      |                  |         | H335                  |

For full text of the H - statements and other abbreviations see section 16 "Other information". Substances without classification may have community workplace exposure limits available.

# **SECTION 4: First aid measures**

### 4.1. Description of first aid measures

General information:

Symptoms of poisoning may occur even after several hours, continue medical observation for at least 48 hours after the accident.

Inhalation:

MSDS-No.: 583758

Move to fresh air, consult doctor if complaint persists.

Skin contact:

IF ON SKIN: Wash with plenty of soap and water.

In case of adverse health effects seek medical advice.

Eye contact:

IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

Ingestion:

Rinse mouth, drink 1-2 glasses of water, do not induce vomiting, consult a doctor.

### 4.2. Most important symptoms and effects, both acute and delayed

EYE: Irritation, conjunctivitis.

SKIN: Redness, inflammation.

### 4.3. Indication of any immediate medical attention and special treatment needed

See section: Description of first aid measures

# **SECTION 5: Firefighting measures**

### 5.1. Extinguishing media

#### Suitable extinguishing media:

Carbon dioxide, foam, powder

# Extinguishing media which must not be used for safety reasons:

Water

# ${\bf 5.2.}$ Special hazards arising from the substance or mixture

In case of fire toxic gases can be released.

# 5.3. Advice for firefighters

Wear self-contained breathing apparatus.

Wear protective equipment.

### **SECTION 6: Accidental release measures**

### 6.1. Personal precautions, protective equipment and emergency procedures

Wear protective equipment.

Avoid contact with skin and eyes.

Keep unprotected persons away.

Danger of slipping on spilled product.

### 6.2. Environmental precautions

Do not empty into drains / surface water / ground water.

### 6.3. Methods and material for containment and cleaning up

Dispose of contaminated material as waste according to Section 13.

Remove with liquid-absorbing material (sand, peat, sawdust).

### 6.4. Reference to other sections

See advice in section 8

# **SECTION 7: Handling and storage**

# 7.1. Precautions for safe handling

Avoid open flames and sources of ignition.

Ground/bond container and receiving equipment.

Use explosion proof electric equipment.

Use only non-sparking tools.

Take precautionary measures against static discharge.

### Hygiene measures:

Wash hands before work breaks and after finishing work.

Do not eat, drink or smoke while working.

Take off contaminated clothing and wash before reuse.

# 7.2. Conditions for safe storage, including any incompatibilities

Ensure good ventilation/extraction.

Temperatures between +5 °C and +35 °C

Keep container tightly sealed. Store in a cool, dry place.

Do not store together with food or other consumables (coffee, tea, tobacco, etc.).

### 7.3. Specific end use(s)

2K Filler paste

# **SECTION 8: Exposure controls/personal protection**

# 8.1. Control parameters

# **Occupational Exposure Limits**

Valid for

Great Britain

| Ingredient [Regulated substance]                  | ppm | mg/m <sup>3</sup> | Value type                           | Short term exposure limit category / Remarks | Regulatory list |

# **Biological Exposure Indices:**

None

# 8.2. Exposure controls:

Engineering controls: Ensure good ventilation/extraction.

### Respiratory protection:

In case of aerosol formation, we recommend wearing of appropriate respiratory protection equipment with ABEK P2 filter (EN 14387).

This recommendation should be matched to local conditions.

#### Hand protection:

Chemical-resistant protective gloves (EN 374). Suitable materials for short-term contact or splashes (recommended: at least protection index 2, corresponding to > 30 minutes permeation time as per EN 374): Fluorinated rubber (FKM; >= 0.7 mm thickness) Suitable materials for longer, direct contact (recommended: protection index 6, corresponding to > 480 minutes permeation time as per EN 374): Fluorinated rubber (FKM; >= 0.7 mm thickness) This information is based on literature references and on information provided by glove manufacturers, or is derived by analogy with similar substances. Please note that in practice the working life of chemical-resistant protective gloves may be considerably shorter than the permeation time determined in accordance with EN 374 as a result of the many influencing factors (e.g. temperature). If signs of wear and tear are noticed then the gloves should be replaced.

Eye protection:

Goggles which can be tightly sealed.

Protective eye equipment should conform to EN166.

Skin protection:

Wear protective equipment.

Protective clothing that covers arms and legs.

Protective clothing should conform to EN 14605 for liquid splashes or to EN 13982 for dusts.

Advices to personal protection equipment:

Use only personal protection that's CE-labelled according to Directive 89/686/EEC (Europe) or to Regulation No. 819 of 19 August 1994 (Norway).

The information provided on personal protective equipment is for guidance purposes only. A full risk assessment should be conducted prior to using this product to determine the appropriate personal protective equipment to suit local conditions. Personal protective equipment should conform to the relevant EN standard.

# **SECTION 9: Physical and chemical properties**

### 9.1. Information on basic physical and chemical properties

Appearance paste

pasty turquoise

Odor characteristic

Odour threshold No data available / Not applicable

pH No data available / Not applicable
Melting point No data available / Not applicable
Solidification temperature No data available / Not applicable

Initial boiling point 145 °C (293 °F) Flash point 32 °C (89.6 °F)

Evaporation rate No data available / Not applicable Flammability No data available / Not applicable Explosive limits No data available / Not applicable

Vapour pressure 6,22 mbar

(20 °C (68 °F)) Vapour pressure

apour pressure 32,97 mbar  $(50 \,^{\circ}\text{C} \, (122 \,^{\circ}\text{F}))$ 

Relative vapour density: No data available / Not applicable Density 1,82 g/cm3

Density 1,82 g/cm3 (20 °C (68 °F))

Bulk density

No data available / Not applicable
Solubility

No data available / Not applicable
No data available / Not applicable
No data available / Not applicable
Partition coefficient: n-octanol/water

No data available / Not applicable
Auto-ignition temperature

No data available / Not applicable
Decomposition temperature

No data available / Not applicable
Viscosity

No data available / Not applicable

Viscosity (kinematic) > 20,5 mm2/s

Explosive properties No data available / Not applicable

Oxidising properties

No data available / Not applicable

### 9.2. Other information

No data available / Not applicable

max. VOC content: 115 g/l

# **SECTION 10: Stability and reactivity**

#### 10.1. Reactivity

Reaction with strong acids. Reaction with strong bases Reacts with alkalis.

### 10.2. Chemical stability

Stable under recommended storage conditions.

### 10.3. Possibility of hazardous reactions

See section reactivity

#### 10.4. Conditions to avoid

Heat, flames, sparks and other sources of ignition.

### 10.5. Incompatible materials

See section reactivity.

### 10.6. Hazardous decomposition products

No decomposition if used according to specifications.

# **SECTION 11: Toxicological information**

# 11.1. Information on toxicological effects

# Acute oral toxicity:

The mixture is classified based on calculation method referring to the classified substances present in the mixture.

| Hazardous substances | Value | Value         | Species | Method        |
|----------------------|-------|---------------|---------|---------------|
| CAS-No.              | type  |               |         |               |
| Styrene              | LD50  | 6.600 - 8.000 | rat     | not specified |
| 100-42-5             |       | mg/kg         |         |               |

### Acute dermal toxicity:

The mixture is classified based on calculation method referring to the classified substances present in the mixture.

| Hazardous substances CAS-No. | Value<br>type | Value         | Species | Method                                     |
|------------------------------|---------------|---------------|---------|--|
| Styrene<br>100-42-5          | LD50          | > 2.000 mg/kg | rat     | OECD Guideline 402 (Acute Dermal Toxicity) |

### Acute inhalative toxicity:

The mixture is classified based on calculation method referring to the classified substances present in the mixture.

| Hazardous substances | Value | Value     | Test atmosphere | Exposure | Species | Method        |
|----------------------|-------|-----------|-----------------|----------|---------|---------------|
| CAS-No.              | type  |           |                 | time     |         |               |
| Styrene              | LC50  | 11,8 mg/l | vapour          | 4 h      | rat     | not specified |
| 100-42-5             |       |           |                 |          |         |               |

#### Skin corrosion/irritation:

No data available.

# Serious eye damage/irritation:

No data available.

# Respiratory or skin sensitization:

The mixture is classified based on threshold limits referring to the classified substances present in the mixture.

| Hazardous substances | Result          | Test type               | Species    | Method                       |
|----------------------|-----------------|-------------------------|------------|------------------------------|
| CAS-No.              |                 |                         |            |                              |
| Styrene              | not sensitising | Guinea pig maximisation | guinea pig | Magnusson and Kligman Method |
| 100-42-5             |                 | test                    |            |                              |

### Germ cell mutagenicity:

The mixture is classified based on threshold limits referring to the classified substances present in the mixture.

| Hazardous substances CAS-No. | Result   | Type of study /<br>Route of<br>administration            | Metabolic<br>activation /<br>Exposure time | Species | Method  |
|------------------------------|----------|--|--|---------|---|
| Styrene<br>100-42-5          | positive | sister chromatid<br>exchange assay in<br>mammalian cells | with and without                           |         | OECD Guideline 479 (Genetic<br>Toxicology: In Vitro Sister<br>Chromatid Exchange Assay in<br>Mammalian Cells) |
| Styrene<br>100-42-5          | negative | inhalation: vapour                                       |  | mouse   | not specified   |

### Carcinogenicity

The mixture is classified based on threshold limits referring to the classified substances present in the mixture.

| Hazardous components CAS-No. | Result           | Route of application  | Exposure<br>time /<br>Frequency<br>of treatment | Species | Sex         | Method   |
|------------------------------|------------------|-----------------------|---|---------|-------------|--|
| Styrene<br>100-42-5          | not carcinogenic | inhalation:<br>vapour | 104 w<br>6 h/d, 5 d/w                           | rat     | male/female | OECD Guideline 453<br>(Combined Chronic<br>Toxicity /<br>Carcinogenicity<br>Studies) |

# Reproductive toxicity:

No data available.

# STOT-single exposure:

No data available.

# STOT-repeated exposure::

The mixture is classified based on threshold limits referring to the classified substances present in the mixture.

| Hazardous substances<br>CAS-No. | Result / Value    | Route of application | Exposure time /<br>Frequency of<br>treatment | Species | Method        |
|---------------------------------|-------------------|----------------------|--|---------|---------------|
| Styrene<br>100-42-5             | NOAEL 1.000 mg/kg | oral: gavage         | daily (5 d/w)                                | rat     | not specified |

### **Aspiration hazard:**

No data available.

MSDS-No.: 583758

# **SECTION 12: Ecological information**

### General ecological information:

Do not empty into drains, soil or bodies of water.

### 12.1. Toxicity

# **Toxicity (Fish):**

The mixture is classified based on calculation method referring to the classified substances present in the mixture.

| Hazardous substances | Value | Value     | Exposure time | Species             | Method               |
|----------------------|-------|-----------|---------------|---------------------|----------------------|
| CAS-No.              | type  |           |               |                     |                      |
| Styrene              | LC50  | 4,02 mg/l | 96 h          | Pimephales promelas | EU Method C.1 (Acute |
| 100-42-5             |       |           |               |                     | Toxicity for Fish)   |

# Toxicity (Daphnia):

The mixture is classified based on calculation method referring to the classified substances present in the mixture.

| Hazardous substances | Value | Value    | Exposure time | Species       | Method               |
|----------------------|-------|----------|---------------|---------------|----------------------|
| CAS-No.              | type  |          |               |               |                      |
| Styrene              | EC50  | 4,7 mg/l | 48 h          | Daphnia magna | OECD Guideline 202   |
| 100-42-5             |       |          |               |               | (Daphnia sp. Acute   |
|                      |       |          |               |               | Immobilisation Test) |

### Chronic toxicity to aquatic invertebrates

The mixture is classified based on calculation method referring to the classified substances present in the mixture.

| Hazardous substances | Value | Value     | Exposure time | Species       | Method                    |
|----------------------|-------|-----------|---------------|---------------|---------------------------|
| CAS-No.              | type  |           |               |               |                           |
| Styrene              | NOEC  | 1,01 mg/l | 21 d          | Daphnia magna | OECD 211 (Daphnia         |
| 100-42-5             |       |           |               |               | magna, Reproduction Test) |

### Toxicity (Algae):

The mixture is classified based on calculation method referring to the classified substances present in the mixture.

| Hazardous substances | Value | Value     | Exposure time | Species                        | Method                    |
|----------------------|-------|-----------|---------------|--------------------------------|---------------------------|
| CAS-No.              | type  |           |               |                                |                           |
| Styrene              | EC10  | 0,28 mg/l |               | 1                              | EPA OTS 797.1050 (Algal   |
| 100-42-5             |       |           |               | (new name: Pseudokirchneriella | Toxicity, Tiers I and II) |
|                      |       |           |               | subcapitata)                   |                           |
| Styrene              | EC50  | 6,3 mg/l  | 96 h          | Selenastrum capricornutum      | EPA OTS 797.1050 (Algal   |
| 100-42-5             |       |           |               | (new name: Pseudokirchneriella | Toxicity, Tiers I and II) |
|                      |       |           |               | subcapitata)                   |                           |

### Toxicity to microorganisms

The mixture is classified based on calculation method referring to the classified substances present in the mixture.

| Hazardous substances | Value | Value    | Exposure time | Species                       | Method                       |
|----------------------|-------|----------|---------------|-------------------------------|------------------------------|
| CAS-No.              | type  |          |               |                               |                              |
| Styrene              | EC50  | 500 mg/l | 30 min        | activated sludge of a         | OECD Guideline 209           |
| 100-42-5             |       |          |               | predominantly domestic sewage | (Activated Sludge,           |
|                      |       |          |               |                               | Respiration Inhibition Test) |

# 12.2. Persistence and degradability

| Hazardous substances | Result                   | Test type | Degradability | Exposure | Method                          |
|----------------------|--------------------------|-----------|---------------|----------|---------------------------------|
| CAS-No.              |                          |           |               | time     |                                 |
| Styrene              | readily biodegradable    | aerobic   | 70,9 %        | 28 d     | ISO DIS 9408 (Ultimate Aerobic  |
| 100-42-5             |                          |           |               |          | BiodegradabilityMethod by       |
|                      |                          |           |               |          | Determining the Oxygen Demand   |
|                      |                          |           |               |          | in a Closed Respirometer)       |
| Styrene              | inherently biodegradable | aerobic   | 100 %         | 14 d     | OECD Guideline 302 C (Inherent  |
| 100-42-5             |                          |           |               |          | Biodegradability: Modified MITI |
|                      |                          |           |               |          | Test (II))                      |

### 12.3. Bioaccumulative potential

| Hazardous substances CAS-No. | Bioconcentratio<br>n factor (BCF) | Exposure time | Temperature | Species | Method           |
|------------------------------|-----------------------------------|---------------|-------------|---------|------------------|
| Styrene                      | 74                                |               |             |         | other guideline: |
| 100-42-5                     |                                   |               |             |         | _                |

# 12.4. Mobility in soil

| Hazardous substances | LogPow | Temperature | Method   |
|----------------------|--------|-------------|--|
| CAS-No.              |        |             |  |
| Styrene              | 2,96   | 25 °C       | OECD Guideline 107 (Partition Coefficient (n-octanol / water), Shake |
| 100-42-5             |        |             | Flask Method)  |

### 12.5. Results of PBT and vPvB assessment

| Hazardous substances<br>CAS-No. | PBT / vPvB   |
|---------------------------------|--|
| Styrene                         | Not fulfilling Persistent, Bioaccumulative and Toxic (PBT), very Persistent and very |
| 100-42-5                        | Bioaccumulative (vPvB) criteria.   |

### 12.6. Other adverse effects

No data available.

# **SECTION 13: Disposal considerations**

### 13.1. Waste treatment methods

Product disposal:

In consultation with the responsible local authority, must be subjected to special treatment.

### Waste code

The valid EWC waste code numbers are source-related. The manufacturer is therefore unable to specify EWC waste codes for the articles or products used in the various sectors. The EWC codes listed are intended as a recommendation for users. We will be happy to advise you. 080111

MSDS-No.: 583758

# **SECTION 14: Transport information**

#### 14.1. **UN** number

| 1866 |
|------|
| 1866 |
| 1866 |
| 1866 |
| 1866 |
|      |

#### 14.2. UN proper shipping name

| ADR  | RESIN SOLUTION |
|------|----------------|
| RID  | RESIN SOLUTION |
| ADN  | RESIN SOLUTION |
| IMDG | RESIN SOLUTION |
| IATA | Resin solution |

#### 14.3. Transport hazard class(es)

| ADR  | 3 |
|------|---|
| RID  | 3 |
| ADN  | 3 |
| IMDG | 3 |
| IATA | 3 |

#### 14.4. Packing group

| ADR  | III |
|------|-----|
| RID  | III |
| ADN  | III |
| IMDG | III |
| IATA | III |

#### 14.5. **Environmental hazards**

| ADR  | not applicable |
|------|----------------|
| RID  | not applicable |
| ADN  | not applicable |
| IMDG | not applicable |
| IATA | not applicable |

#### 14.6. Special precautions for user

| ADR  | Special provision 640E |
|------|------------------------|
|      | Tunnelcode: (D/E)      |
| RID  | Special provision 640E |
| ADN  | Special provision 640E |
| IMDG | not applicable         |
| IATA | not applicable         |

When transporting as a set (component A and B) then the following dangerous good classification is used: UN 3269 Polyester resin kit, 3, III.

#### 14.7. Transport in bulk according to Annex II of Marpol and the IBC Code

not applicable

# **SECTION 15: Regulatory information**

15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture 0 %

**VOC Paints and Varnishes (EU):** 

Regulatory Basis: Directive 2004/42/EC
Product (sub)category: B(b) Bodyfiller/stopper

Phase I (from 1.1.2007): 250 g/l max. VOC content: 115 g/l

#### 15.2. Chemical safety assessment

A chemical safety assessment has not been carried out.

# **SECTION 16: Other information**

The labelling of the product is indicated in Section 2. The full text

of all abbreviations indicated by codes in this safety data sheet are as follows:

H226 Flammable liquid and vapor.

H304 May be fatal if swallowed and enters airways.

H315 Causes skin irritation.

H319 Causes serious eye irritation.

H332 Harmful if inhaled.

H335 May cause respiratory irritation.

H361d Suspected of damaging the unborn child.

H372 Causes damage to organs through prolonged or repeated exposure.

H412 Harmful to aquatic life with long lasting effects.

#### **Further information:**

This information is based on our current level of knowledge and relates to the product in the state in which it is delivered. It is intended to describe our products from the point of view of safety requirements and is not intended to guarantee any particular properties.

Relevant changes in this safety data sheet are indicated by vertical lines at the left margin in the body of this document. Corresponding text is displayed in a different color on shadowed fields.

TEROSON UP 150 CAN 332G EN

### SECTION 1: Identification of the substance/mixture and of the company/undertaking

### 1.1. Product identifier

TEROSON UP 150 CAN 332G EN

#### Contains

Dibenzoyl peroxide

### 1.2. Relevant identified uses of the substance or mixture and uses advised against

Intended use:

hardener component

#### 1.3. Details of the supplier of the safety data sheet

Henkel Ltd

Wood Lane End

HP2 4RQ Hemel Hempstead

Great Britain

Phone: +44 1442 278000 Fax-no.: +44 1442 278071

ua-productsafety.uk@henkel.com

### 1.4. Emergency telephone number

24 Hours Emergency Tel: +44 0 8701 906777 - For further general health & safety, technical and practical advice on this product, please call +44 (0) 1606 593933 or write to: Technical Services; Henkel Limited; Road 5; Winsford Industrial Estate; Winsford; Cheshire; CW7 3QY- Email: technical.services@henkel.co.uk

### **SECTION 2: Hazards identification**

### 2.1. Classification of the substance or mixture

#### Classification (CLP):

Serious eye irritation Category 2

H319 Causes serious eye irritation.

Skin sensitizer Category 1

H317 May cause an allergic skin reaction.

Acute hazards to the aquatic environment Category 1

H400 Very toxic to aquatic life.

Chronic hazards to the aquatic environment Category 1

H410 Very toxic to aquatic life with long lasting effects.

Organic peroxides Type E
Type F

H242 Heating may cause a fire.

# 2.2. Label elements

#### Label elements (CLP):

Hazard pictogram:

Signal word: Warning

**Hazard statement:** H317 May cause an allergic skin reaction.

H319 Causes serious eye irritation.

H410 Very toxic to aquatic life with long lasting effects.

H242 Heating may cause a fire.

**Precautionary statement:** P101 If medical advice is needed, have product container or label at hand.

P102 Keep out of reach of children.

P103 Read label before use.

P280 Wear protective gloves/protective clothing/eye protection/face protection.

P305+P351+P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove

contact lenses, if present and easy to do. Continue rinsing.

**Precautionary statement:** P302+P35

Prevention

P302+P352 IF ON SKIN: Wash with plenty of soap and water.

P273 Avoid release to the environment.

**Precautionary statement:** 

Disposal

P501 Dispose of contents/container in accordance with national regulation.

#### 2.3. Other hazards

Not fulfilling Persistent, Bioaccumulative and Toxic (PBT), very Persistent and very Bioaccumulative (vPvB) criteria.

# **SECTION 3: Composition/information on ingredients**

# 3.2. Mixtures

#### General chemical description:

Hardener

# Base substances of preparation:

Dibenzoyl peroxide

### Declaration of the ingredients according to CLP (EC) No 1272/2008:

| Hazardous components | EC Number        | content  | Classification                          |

|                      |                  |          | M factor (Acute Aquat Tox): 10 M factor |
|                      |                  |          | (Chron Aquat Tox): 10                   |

For full text of the H - statements and other abbreviations see section 16 "Other information". Substances without classification may have community workplace exposure limits available.

# **SECTION 4: First aid measures**

Inhalation

Move to fresh air, consult doctor if complaint persists.

Skin contact:

IF ON SKIN: Wash with plenty of soap and water. In case of adverse health effects seek medical advice.

Eye contact:

IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

Ingestion:

Rinse mouth, drink 1-2 glasses of water, do not induce vomiting, consult a doctor.

### 4.2. Most important symptoms and effects, both acute and delayed

EYE: Irritation, conjunctivitis.

SKIN: Rash, Urticaria.

### 4.3. Indication of any immediate medical attention and special treatment needed

See section: Description of first aid measures

# **SECTION 5: Firefighting measures**

#### 5.1. Extinguishing media

### Suitable extinguishing media:

carbon dioxide, foam, powder, water spray jet, fine water spray

#### Extinguishing media which must not be used for safety reasons:

High pressure waterjet

# 5.2. Special hazards arising from the substance or mixture

In case of fire toxic gases can be released.

#### 5.3. Advice for firefighters

Wear self-contained breathing apparatus.

Wear protective equipment.

### **SECTION 6: Accidental release measures**

### 6.1. Personal precautions, protective equipment and emergency procedures

Wear protective equipment.

Avoid contact with skin and eyes.

Keep unprotected persons away.

### 6.2. Environmental precautions

Do not empty into drains / surface water / ground water.

Inform authorities in the event of product spillage to water courses or sewage systems.

### 6.3. Methods and material for containment and cleaning up

Remove mechanically.

Dispose of contaminated material as waste according to Section 13.

### 6.4. Reference to other sections

See advice in section 8

# **SECTION 7: Handling and storage**

MSDS-No.: 572846 V001.3

### 7.1. Precautions for safe handling

Use only in well-ventilated areas.

Avoid open flames and sources of ignition.

Take measures to prevent the build-up of electrostatic charges.

No smoking.

### Hygiene measures:

Wash hands before work breaks and after finishing work.

Do not eat, drink or smoke while working.

### 7.2. Conditions for safe storage, including any incompatibilities

Store in sealed original container.

Ensure good ventilation/extraction.

Store in a cool, dry place.

Temperatures between 0 °C and + 30 °C

Keep away from heat and direct sunlight.

Do not store together with food or other consumables (coffee, tea, tobacco, etc.).

Do not store together with oxidants.

Do not store together with reductants.

### 7.3. Specific end use(s)

hardener component

# SECTION 8: Exposure controls/personal protection

### 8.1. Control parameters

### **Occupational Exposure Limits**

Valid for

Great Britain

| Ingredient [Regulated substance]                       | ppm | mg/m <sup>3</sup> | Value type                           | Short term exposure limit category / Remarks | Regulatory list |

# **Biological Exposure Indices:**

None

# 8.2. Exposure controls:

Engineering controls:

Ensure good ventilation/extraction.

# Respiratory protection:

In case of dust formation, we recommend wearing of appropriate respiratory protection equipment with particle filter P (EN 14387).

This recommendation should be matched to local conditions.

Hand protection:

Chemical-resistant protective gloves (EN 374).

Suitable materials for short-term contact or splashes (recommended: at least protection index 2, corresponding to > 30 minutes permeation time as per EN 374):

nitrile rubber (NBR; >= 0.4 mm thickness)

Suitable materials for longer, direct contact (recommended: protection index 6, corresponding to > 480 minutes permeation time as per EN 374):

nitrile rubber (NBR; >= 0.4 mm thickness)

This information is based on literature references and on information provided by glove manufacturers, or is derived by analogy with similar substances. Please note that in practice the working life of chemical-resistant protective gloves may be considerably shorter than the permeation time determined in accordance with EN 374 as a result of the many influencing factors (e.g. temperature). If signs of wear and tear are noticed then the gloves should be replaced.

Eye protection:

Goggles which can be tightly sealed.

Protective eye equipment should conform to EN166.

Skin protection:

Wear protective equipment.

Protective clothing that covers arms and legs.

Protective clothing should conform to EN 14605 for liquid splashes or to EN 13982 for dusts.

Advices to personal protection equipment:

Use only personal protection that's CE-labelled according to Directive 89/686/EEC (Europe) or to Regulation No. 819 of 19 August 1994 (Norway).

The information provided on personal protective equipment is for guidance purposes only. A full risk assessment should be conducted prior to using this product to determine the appropriate personal protective equipment to suit local conditions. Personal protective equipment should conform to the relevant EN standard.

# **SECTION 10: Stability and reactivity**

### 10.1. Reactivity

Reaction with reducing agents. Reaction with amines Reaction with strong acids. Reacts with alkalis. Heavy metals.

#### 10.2. Chemical stability

Stable under recommended storage conditions.

### 10.3. Possibility of hazardous reactions

See section reactivity

#### 10.4. Conditions to avoid

None if used for intended purpose.

### 10.5. Incompatible materials

See section reactivity.

### 10.6. Hazardous decomposition products

No decomposition if used according to specifications.

# **SECTION 11: Toxicological information**

### 11.1. Information on toxicological effects

### Acute oral toxicity:

The mixture is classified based on calculation method referring to the classified substances present in the mixture.

| Hazardous substances CAS-No.  | Value<br>type | Value         | Species | Method        |
|-------------------------------|---------------|---------------|---------|---------------|
| Dibenzoyl peroxide<br>94-36-0 | LD50          | > 5.000 mg/kg | rat     | not specified |

### Acute dermal toxicity:

No data available.

### Acute inhalative toxicity:

The mixture is classified based on calculation method referring to the classified substances present in the mixture.

| Hazardous substances CAS-No. | Value<br>type | Value       | Test atmosphere | Exposure time | Species | Method        |
|------------------------------|---------------|-------------|-----------------|---------------|---------|---------------|
| Dibenzoyl peroxide           | LC50          | > 24,3 mg/l | vapour          | 4 h           | rat     | not specified |
| 94-36-0                      |               |             |                 |               |         |               |

#### Skin corrosion/irritation:

No data available.

### Serious eye damage/irritation:

No data available.

# Respiratory or skin sensitization:

No data available.

The mixture is classified based on threshold limits referring to the classified substances present in the mixture.

| Hazardous substances<br>CAS-No. | Result      | Test type                          | Species | Method   |

# **SECTION 12: Ecological information**

### General ecological information:

Do not empty into drains, soil or bodies of water.

### 12.1. Toxicity

### Toxicity (Fish):

The mixture is classified based on calculation method referring to the classified substances present in the mixture.

| Hazardous substances | Value | Value     | Exposure time | Species             | Method                    |
|----------------------|-------|-----------|---------------|---------------------|---------------------------|
| CAS-No.              | type  |           |               |                     |                           |
| Dibenzoyl peroxide   | LC50  | 0,06 mg/l | 96 h          | Oncorhynchus mykiss | OECD Guideline 203 (Fish, |
| 94-36-0              |       | -         |               |                     | Acute Toxicity Test)      |

### Toxicity (Daphnia):

The mixture is classified based on calculation method referring to the classified substances present in the mixture.

| Hazardous substances | Value | Value     | Exposure time | Species       | Method               |
|----------------------|-------|-----------|---------------|---------------|----------------------|
| CAS-No.              | type  |           |               |               |                      |
| Dibenzoyl peroxide   | EC50  | 0,11 mg/l | 48 h          | Daphnia magna | OECD Guideline 202   |
| 94-36-0              |       |           |               |               | (Daphnia sp. Acute   |
|                      |       |           |               |               | Immobilisation Test) |

### Chronic toxicity to aquatic invertebrates

The mixture is classified based on calculation method referring to the classified substances present in the mixture.

| Hazardous substances CAS-No. | Value<br>type | Value      | Exposure time | Species       | Method                    |
|------------------------------|---------------|------------|---------------|---------------|---------------------------|
| Dibenzoyl peroxide           | EC10          | 0,001 mg/l | 21 d          | Daphnia magna | OECD 211 (Daphnia         |
| 94-36-0                      |               |            |               |               | magna, Reproduction Test) |

### **Toxicity (Algae):**

The mixture is classified based on calculation method referring to the classified substances present in the mixture.

| Hazardous substances<br>CAS-No. | Value<br>type | Value      | Exposure time | Species                         | Method   |
|---------------------------------|---------------|------------|---------------|---------------------------------|--|
| Dibenzoyl peroxide<br>94-36-0   | ErC50         | 0,071 mg/l | 72 h          | Pseudokirchneriella subcapitata | OECD Guideline 201 (Alga,<br>Growth Inhibition Test) |
| Dibenzoyl peroxide<br>94-36-0   | NOEC          | 0,02 mg/l  | 72 h          | Pseudokirchneriella subcapitata | OECD Guideline 201 (Alga,<br>Growth Inhibition Test) |

### Toxicity to microorganisms

The mixture is classified based on calculation method referring to the classified substances present in the mixture.

| Hazardous substances | Value | Value   | Exposure time | Species | Method                       |
|----------------------|-------|---------|---------------|---------|------------------------------|
| CAS-No.              | type  |         |               |         |                              |
| Dibenzoyl peroxide   | EC 50 | 35 mg/l | 3 h           |         | OECD Guideline 209           |
| 94-36-0              |       |         |               |         | (Activated Sludge,           |
|                      |       |         |               |         | Respiration Inhibition Test) |

# 12.2. Persistence and degradability

| Hazardous substances | Result                | Test type | Degradability | Exposure | Method                          |
|----------------------|-----------------------|-----------|---------------|----------|---------------------------------|
| CAS-No.              |                       |           |               | time     |                                 |
| Dibenzoyl peroxide   | readily biodegradable | aerobic   | 71 %          | 28 d     | OECD Guideline 301 D (Ready     |
| 94-36-0              |                       |           |               |          | Biodegradability: Closed Bottle |
|                      |                       |           |               |          | Test)                           |

# 12.3. Bioaccumulative potential

| Hazardous substances<br>CAS-No. | Bioconcentratio<br>n factor (BCF) | Exposure time | Temperature | Species | Method                          |
|---------------------------------|-----------------------------------|---------------|-------------|---------|---------------------------------|
| Dibenzoyl peroxide              | 66,6                              |               |             | fish    | OECD Guideline 305              |
| 94-36-0                         |                                   |               |             |         | (Bioconcentration: Flow-through |
|                                 |                                   |               |             |         | Fish Test)                      |

### 12.4. Mobility in soil

| Hazardous substances | LogPow | Temperature | Method  |
|----------------------|--------|-------------|---|
| CAS-No.              |        |             |   |
| Dibenzoyl peroxide   | 3,2    | 22 °C       | OECD Guideline 117 (Partition Coefficient (n-octanol / water), HPLC |
| 94-36-0              |        |             | Method)   |

### 12.5. Results of PBT and vPvB assessment

| Hazardous substances | PBT / vPvB   |
|----------------------|--|
| CAS-No.              |  |
| Dibenzoyl peroxide   | Not fulfilling Persistent, Bioaccumulative and Toxic (PBT), very Persistent and very |
| 94-36-0              | Bioaccumulative (vPvB) criteria.   |

### 12.6. Other adverse effects

No data available.

# **SECTION 13: Disposal considerations**

### 13.1. Waste treatment methods

Product disposal:

In consultation with the responsible local authority, must be subjected to special treatment.

#### Waste code

The valid EWC waste code numbers are source-related. The manufacturer is therefore unable to specify EWC waste codes for the articles or products used in the various sectors. The EWC codes listed are intended as a recommendation for users. We will be happy to advise you. 080409

# **SECTION 14: Transport information**

### 14.1. UN number

| ADR  | 3108 |
|------|------|
| RID  | 3108 |
| ADN  | 3108 |
| IMDG | 3108 |
| IATA | 3108 |

# 14.2. UN proper shipping name

| ADR                 | ORGANIC PEROXIDE TYPE E, SOLID (DIBENZOYL PEROXIDE) |
|---------------------|---|
| RID                 | ORGANIC PEROXIDE TYPE E, SOLID (DIBENZOYL PEROXIDE) |
| ADN                 | ORGANIC PEROXIDE TYPE E, SOLID (DIBENZOYL PEROXIDE) |
| IMDG                | ORGANIC PEROXIDE TYPE E, SOLID (DIBENZOYL PEROXIDE) |
| $I\Lambda T\Lambda$ | Organic paravida typa F. solid (Dibanzovi paravida) |

IATA Organic peroxide type E, solid (Dibenzoyl peroxide)

### 14.3. Transport hazard class(es)

| 5.2        |
|------------|
| 5.2        |
| 5.2        |
| 5.2        |
| 5.2 (HEAT) |
|            |

# 14.4. Packing group

ADR RID ADN IMDG IATA

### 14.5. Environmental hazards

| ADR  | Environmentally Hazardous |
|------|---------------------------|
| RID  | Environmentally Hazardous |
| ADN  | Environmentally Hazardous |
| TMDC | 3.4                       |

IMDG Marine pollutant IATA not applicable

### 14.6. Special precautions for user

| ADR  | not applicable  |
|------|-----------------|
|      | Tunnelcode: (D) |
| RID  | not applicable  |
| ADN  | not applicable  |
| IMDG | not applicable  |
| IATA | not applicable  |

When transporting as a set (component A and B) then the following dangerous good classification is used: UN 3269 Polyester resin kit, 3, III.

# 14.7. Transport in bulk according to Annex II of Marpol and the IBC Code

not applicable

# **SECTION 15: Regulatory information**

CH) VOC content (2010/75/EU)

0 %

#### 15.2. Chemical safety assessment

A chemical safety assessment has not been carried out.

# **SECTION 16: Other information**

The labelling of the product is indicated in Section 2. The full text

of all abbreviations indicated by codes in this safety data sheet are as follows:

H241 Heating may cause a fire or explosion.

H317 May cause an allergic skin reaction.

H319 Causes serious eye irritation.

H400 Very toxic to aquatic life.

H410 Very toxic to aquatic life with long lasting effects.

### **Further information:**

This information is based on our current level of knowledge and relates to the product in the state in which it is delivered. It is intended to describe our products from the point of view of safety requirements and is not intended to guarantee any particular properties.

Relevant changes in this safety data sheet are indicated by vertical lines at the left margin in the body of this document. Corresponding text is displayed in a different color on shadowed fields.
