Tightening and installation work requires many different profiles. The 60-piece nut driver insert set from Wiha offers users an extensive selection of the most widely used 1/4" and 1/2" nut driver inserts in sizes from 4 - 14 mm as well as 10 - 34 mm. This allows users to easily tighten and loosen any fastening. 19 bits, a bit holder, two ratchet wrenches, four extensions and two universal joints complement the set, offering users a very wide range of tools for installation and mounting activities. In addition, the ergonomically designed SoftFinish® screwdriver with magnetic bit holder allows fastening that is particularly gentle on the hands. The included ratchet wrench combined with the selection of nut drivers gives users the required flexibility for their work. When working with the ratchet wrench, the user benefits from the fine tothing with 72 teeth, offering a short return angle. The right or left rotation can be variably adjusted by the integrated switching lever. The combination with the included extensions allows users to conveniently reach deep-set screws and nuts. The nut driver and extensions are mechanically locked. The change is initiated by pressing the activation button. Made of high quality chrome vanadium steel, the nut driver inserts are distinguished by their longevity and robustness, not the least thanks to their corrosion-resistant and easy to clean surface. Thanks to the L Boxx with a Wiha design, all tools are securely organized in a flexible transportation and storage system. The robust design makes them suitable for all 'the' requirements of professional users, while the click mechanism makes them easy to stack and transport. The non-slip surface finish ensures a strong grip, even in oily or wet work situations.
