Clarification Letter

F series Molded J-Lead Tantalum Chip Capacitors

Dear Valued Customer,

Thank you very much for your great and continuous support for business with AVX.

As it has been notified in our PCN-8-2019 and PCN-29-2019 the production of our F-series Molded J-Lead MnO2 tantalum chip capacitors has been discontinued at our Adogawa, Japan facility and moved to our El Salvador facility, the affected series being:

Commercial series: F91, F92, F93 and F93 BE1. 

Automotive series: F91 AJ6, F93 AJ6, F97, F97 HT3 and F9H

This clarification letter confirm that our Japan facility is no longer processing new orders. The part numbers that our El Salvador facility can make are currently being processed, values that are out of range are being rejected, some values are still finalizing qualification at our El Salvador facility.

Please contact your local customer service for your order status.

Should you have any questions or concerns, please contact
