5MP HDCVI FULL-COLOUR ACTIVE DETERRANCE TURRET

· 24/7 colour imaging

· Active deterrence with red blue light, siren and alarm out interface

· Built-in mic

· Max. 20 fps@5MP

· 2.8 mm fixed lens

· 40 m illumination distance

· IP67, 12V±30% DC

Full-colour · Active Deterrence · 5Mp · DC 12V · IP67 · Audio

System Overview

This model supports active deterrence which warns off intruders with a red to blue light and siren even before users are aware of the incident. It is able to alert intruders accurately by SMD Plus or Perimeter Protection of XVRs. This camera is an ideal choice for applications which require intrusion protection and video verification, such as courtyards, offices, warehouses, stores.

Functions

4 Signals over 1 Coaxial Cable

HDCVI technology supports 4 signals to be transmitted over 1 coaxial cable simultaneously, such as video, audio*, data and power. Dual-way data transmission allows the HDCVI camera to interact with the HCVR, such as sending control signal or triggering alarm. Moreover, HDCVI technology supports PoC for construction flexibility.

* Audio input is available for some models of HDCVI cameras.

Long Distance Transmission

HDCVI technology guarantees real-time transmission at long distance without any loss. It supports up to 700m transmission for 5MP HD video over a coaxial cable, and up to 300m over UTP cable.

Simplicity

HDCVI technology inherits the feature of simplicity from traditional analog surveillance systems, making itself the best choice for investment protection. HDCVI systems can seamlessly upgrade the traditional analog system without replacing existing coaxial cabling. The plug and play approach enables full HD video surveillance without the hassle of configuring a network.

Active Deterrence

Active deterrence is to warn off intruders actively with red to blue light and siren even before users are aware of the incidence. Once an intrusion is detected, the red blue light will flash and the siren will buzzer to alert the intruder. The content of siren is configurable.

Full-colour

The camera adopts F1.2 large aperture lens and 1/2.7" high performance sensor. With a high amount of absorbed light and advanced image processing algorithms, the camera can be able to present 24/7 colored imaged that provide colour details to accurately identify people or objects in low light conditions.

Warm Supplemental lights

With two warm supplemental LED lights, the camera is able to provide a colorful and vivid image even in total darkness. It also provides visibility by default, the camera is set to smart light mode, in which the camera can automatically adjust the exposure time and light sensitivity simultane-ously to avoid overexposure of objects in the image center. Also, the sensitivity and intensity of the LED lights can be remotely controlled by the OSD menu.

Protection

The camera's outstanding reliability is unsurpassed due to its rugged design. The camera is protected against water and dust with an IP67 rating, making it suitable for indoor or outdoor environments.
Supporting ±30% input voltage tolerance, this camera suits even the most unstable power supply conditions. Its 4KV lightning rating provides protection against the camera and its structure from the effects of lightning.
