

MAGICGEL Sprint

Your "MAGIC" is all in one and when needed, even more sustainable: prepare it directly into the bottle. Zero jugs, zero spatulas.

1. Unscrew
2. Activate
3. Shake **10"** Sec.

Take it easy!

Ready in 1 bottle!

Magic Gel Sprint, the sealing and insulating filler for the protection of electrical connections, is formulated for an extra fast curing directly into the bottle. It combines the dielectric, sealant and thermal characteristics, that have made **Magic Gel** the most popular insulating filler for installers since 2005, with ease of use, with a focus on sustainability.

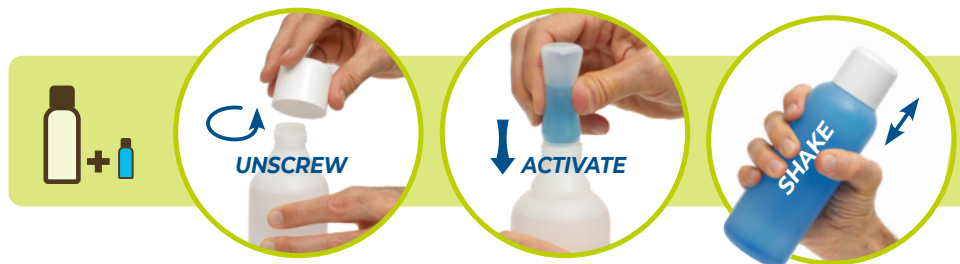

- ▶ For POWER CABLES, TELECOM CABLES and ELECTRONIC CIRCUITS.
- ▶ Non-toxic, safe and not classified as hazardous under CLP Directive.
- ▶ Suitable for installation in salt water (sea) and in chlorinated water (pools).
- ▶ For any type of indoor / outdoor and even submerged installation.
- ▶ Even suitable for high depths under water.
- ▶ For installations up to 1 kV.
- ▶ Suitable for high temperatures.
- ▶ Removable.
- ▶ No shelf life.

Extra fast curing!

- Gel: UL 94-HB
- Dielectric strength: >23 kV/mm
- Cross linking time: fast (about 7 min. at 23°C)
- Volume resistivity: >2 . 10¹⁵ Ω cm
- Working temperature: -60°C / +200°C
- Overload temperature for short periods: up to 250°C
- Stabilised for: mould - UV
- Degree of protection: IP68 (in proper casings)
