

Stone Plague Cleaner is a water-based cleaning agent for cleaning and removing algae and lichen from exterior pavers - quite commonly referred to as Black Spot. Application with a Nilfisk Foam Sprayer. Coverage: Approx 125 m2 per 2½ litres Stone Plague Cleaner is an efficient detergent for removing any unwanted dirt, algae and lichens from the exterior pavers. Always test on a small area to make sure the surface tolerates the cleaning detergent. Packaging may be recycled in accordance with local regulations. A biodegradable surface cleaner in accordance with EU legislation. Store in a frost-free place.

Dosage: For use with HPW: 2-5% Manual use: 1-2 dl. to 5 ltr. litres of tap water.

Apply with High-pressure washer Foam sprayer (item no. 128500077) that is supplied with your HPW, or purchase the new Super Foam Sprayer (item no. 128500938) which is available as an optional accessory. Fill the Foam Sprayer or onboard detergent tank with the detergent diluted to the recommended dosage. After testing on a small test area, apply detergent to the area to be cleaned. Wait 15-20 minutes. After cleaning, remove the foam sprayer and lance and rinse the area off with water using the low pressure gun. Avoid spraying plants and painted surfaces with the detergent, if this occurs rinse immediately with clean water. This detergent can also be used in combination with the Nilfisk Patio Cleaner.
