Performance Compound 455

AK-455-5G is a new improved formulated thermal compound that gives hi-performance heat transfer between the CPU and heatsink. Minimised resistance and maximised efficiency truly enables you to get more from your cooler. Easy to use. RoHS compliant.

- Hi-performance heat transfer between the CPU and heatsink
- Maximum thermal conductivity, 2.4W/mK
- Easy to apply with spreader card
- Multi-language instructions included
- RoHS Compliant

Colour	Grey
Viscosity	76 cP
Thermal conductivity	2.4 W/mK
Operating temperature	-50 ~ 240°C
Volume	5g
Product code	AK-455-5G
