4. For Notebook computer

- Step 1. Read the Safety and Warning information above.
- Step 2. Please refer to your notebook computer user manual or check on the back of the notebook computer to find the correct input voltage requirement for your notebook computer. To select proper input voltage (10V (9.5/10.5V), 12V, 15V, 16V, 18V (18/18.5V), 19V (19/19.5V), 20V) on the Adapter to fit your notebook computer need (Picture 1), please manually move the voltage selection switch located on the right bottom of the adapter. The LED indicator (on the right top of the adapter) will show the voltage that you have manually selected.
- Step 3. Choose correct tip connector to fit your laptops power socket and connect it to the Adapter output cable (Picture 2).

For more detail info about tip selections, please visit http://www.prudentway.com check UNIVERSAL ADAPTERS.

Warning:

DO NOT use Tip L for HP Laptops. DO NOT use Tip M for DELL Laptops.

Note! Each tip connector has a special 2-pin design with only one pluggable direction to make sure you do not plug the tip connector to the wrong direction on the adapter output cable and cause damage to your notebook. If you experience difficulty to plug the tip connector to the holes on the output cable, please check if you plug it to the wrong direction.

- Step 4. Connect the tip connector to the power socket of your notebook (Picture 3).
- Step 5. Connect the Adapter input power cable to the AC socket of the Adapter (Picture 4). Then plug the other end of AC power cable to the wall outlet (Picture 5).
- Step 6. Turn on and use your notebook.

For devices with USB interfaces such as MP3, cell phones, iPod, iPhone, iPad and more*:

- Step 1. Read the Safety and Warning information above.
- Step 2. Please connect the USB Type A cable provided by your USB device company to the USB port of the Adapter.
- Step 3. Follow Step 5 as stated above.
- Step 4. Turn on and use your USB device.

For LCDs: Please follow the same steps as you use for notebook computer. Most LCDs use 12V.
