CAT6A/CAT7/CAT8 Shielded RJ45 Plug with extended earth clip
(Pack of 10)

- Suitable for CAT6A, CAT7 and CAT8 Cables. Special CAT6A RJ45 crimp tool for extended earth clip required – see KAUDEN XT486 for example
- Universal type for solid installation or patch cord stranded cables. 1.45mm max conductor size
- Two-part design with extended ground clip used for outside cables up to 8.5mm diameter
- Use only special RJ45 Crimping Tool designed for Extended Earth Clip Plugs (available)
- Made from Polycarbonate – UL94 Rated Flame Retardant-50 Micron Gold Plated

These types of plugs are generally used on CAT6A/ CAT7 or CAT8 oversized cables which are now becoming common place and have larger inner conductors which are too large for standard plugs (having a smaller hole size for the inner conductors). Also, on these plugs there is no push down cable clamp as used on the standard RJ45 plugs and therefore you need a special crimp tool which also should be able to clamp the extended ground clip around the cable. Designated Crimp tool is available. Search for KAUDEN XT486 Dual use crimping tool
