

22000 MOUNT SERIES

Low-profile, high capacity mounts for vibration and shock protection.

APPLICATIONS

- Truck, bus and marine engines
- Generators
- HVAC equipment
- Electronic equipment
- Truck cabs
- Machinery, pumps & compressors

FEATURES

- Fail-safe when used with snubbing washer
- Axial to radial stiffness of 1:1
- Low natural frequency
- Sturdy, reliable construction

BENEFITS

- Economical
- Bonded construction provides constant performance characteristics
- Overlapping load ranges

LOAD RANGE

- 5 sizes with 25 load ratings to 4,560 lbs. per isolator

22000 Series mounts are designed to withstand the rigors of heavy-duty vehicular applications, off-the-road equipment, large trucks and construction equipment. The standard neoprene elastomer is resistant to oil. Other materials are available on special order.

Specifications

• Natural Frequency	8-18 Hertz
• Transmissibility at resonance	8:1
• Resilient Element	Neoprene
• Standard Materials	Steel
• Weight	See dimensional drawings

Environmental Data

- Neoprene elastomer has an operating temperature range of -20°F to +180°F (-30°C to +82°C) and is resistant to oils, most solvents and ozone.
- Special elastomers and finishes are available for applications in severe environments.

22000 MOUNT SERIES: SNUBBING WASHER & 22005

Performance Data & Dimensions

22000 MOUNT SERIES SNUBBING WASHER

The use of snubbing washers is required to ensure proper static and dynamic loading of the isolator and retention of suspended equipment under severe shock environments.

Snubbing washers are ordered by separate part numbers as shown in the table below. The standard material is low-carbon steel and the standard finish is zinc plate. Other materials and finishes are available upon request.

Size	"A" Dia.	"B" Dia.	"C"	Part #
22001	1.56	.391	.090	9810145-01804
