

## **INTRODUCTION**

This is a 300mm servo extension cable. This comes in very handy when your servo is further away from the controller than the wire on the servo allows. Male connector on one end goes to controller, female connector mates with servo. Fits all Hitec, Futaba, JR, Multiplex, and Airtronics Z servos. Wire can also be used as a simple 0.1" jumper cable.

## **SPECIFICATION**

Length:300mm (11.8 in)

## **SHIPPING LIST**
