

**LOCTITE 572** 

# Safety Data Sheet according to (EC) No 1907/2006 as amended

Page 1 of 17

SDS No.: 454059 V008.0

Revision: 24.06.2021

printing date: 25.06.2021

Replaces version from: 29.04.2021

## SECTION 1: Identification of the substance/mixture and of the company/undertaking

#### 1.1. Product identifier

LOCTITE 572

### 1.2. Relevant identified uses of the substance or mixture and uses advised against

Intended use:

Anaerobic

### 1.3. Details of the supplier of the safety data sheet

Henkel Ltd Adhesives

Wood Lane End

HP2 4RQ Hemel Hempstead

Great Britain

Phone: +44 (1442) 278000 Fax-no.: +44 (1442) 278071

ua-productsafety.uk@henkel.com

For Safety Data Sheet updates please visit our website https://mysds.henkel.com/index.html#/appSelection or www.henkel-adhesives.com.

## 1.4. Emergency telephone number

24 Hours Emergency Tel: +44 (0)1442 278497

## **SECTION 2: Hazards identification**

### 2.1. Classification of the substance or mixture

#### Classification (CLP):

Serious eye irritation H319 Causes serious eye irritation. Category 2

#### 2.2. Label elements

## Label elements (CLP):

Hazard pictogram:

Signal word: Warning

**Hazard statement:** H319 Causes serious eye irritation.

Supplemental information EUH211 Warning! Hazardous respirable droplets may be formed when sprayed. Do not

breathe spray or mist.

Contains: Linalool May produce an allergic reaction.

**Precautionary statement:** "\*\*\*For consumer use only: P101 If medical advice is needed, have product

container or label at hand. P102 Keep out of reach of children. P501 Dispose of

contents/container in accordance with national regulation.\*\*\*

**Precautionary statement:** 

Response

P337+P313 If eye irritation persists: Get medical advice/attention.

#### 2.3. Other hazards

None if used properly.

Not fulfilling Persistent, Bioaccumulative and Toxic (PBT), very Persistent and very Bioaccumulative (vPvB) criteria.

## **SECTION 3: Composition/information on ingredients**

#### 3.2. Mixtures

#### General chemical description:

Anaerobic adhesive

#### Declaration of the ingredients according to CLP (EC) No 1272/2008:

| Hazardous components<br>CAS-No. | EC Number<br>REACH-Reg No.    | content   | Classification              |

|                                 |                               |           | H317                        |

For full text of the H - statements and other abbreviations see section 16 "Other information". Substances without classification may have community workplace exposure limits available.

### **SECTION 4: First aid measures**

#### 4.1. Description of first aid measures

Inhalation:

Move to fresh air. If symptoms persist, seek medical advice.

Skin contact:

Rinse with running water and soap.

Obtain medical attention if irritation persists.

Eve contact:

Rinse immediately with plenty of running water (for 10 minutes), seek medical attention from a specialist.

Ingestion:

Rinse mouth, drink 1-2 glasses of water, do not induce vomiting, consult a doctor.

#### 4.2. Most important symptoms and effects, both acute and delayed

EYE: Irritation, conjunctivitis.

Prolonged or repeated contact may cause skin irritation.

#### 4.3. Indication of any immediate medical attention and special treatment needed

See section: Description of first aid measures

### **SECTION 5: Firefighting measures**

#### 5.1. Extinguishing media

### Suitable extinguishing media:

Carbon dioxide, foam, powder

#### Extinguishing media which must not be used for safety reasons:

None known

#### 5.2. Special hazards arising from the substance or mixture

In the event of a fire, carbon monoxide (CO), carbon dioxide (CO2) and nitrogen oxides (NOx) can be released.

#### 5.3. Advice for firefighters

Wear self-contained breathing apparatus and full protective clothing, such as turn-out gear.

### Additional information:

In case of fire, keep containers cool with water spray.

# **SECTION 6: Accidental release measures**

#### 6.1. Personal precautions, protective equipment and emergency procedures

Ensure adequate ventilation.

Avoid contact with skin and eyes.

Wear protective equipment.

#### 6.2. Environmental precautions

Do not empty into drains / surface water / ground water.

### 6.3. Methods and material for containment and cleaning up

For small spills wipe up with paper towel and place in container for disposal.

For large spills absorb onto inert absorbent material and place in sealed container for disposal.

Dispose of contaminated material as waste according to Section 13.

## 6.4. Reference to other sections

See advice in section 8

## **SECTION 7: Handling and storage**

### 7.1. Precautions for safe handling

Use only in well-ventilated areas.

Avoid skin and eye contact.

Prolonged or repeated skin contact should be avoided to minimise any risk of sensitisation.

See advice in section 8

### Hygiene measures:

Good industrial hygiene practices should be observed.

Do not eat, drink or smoke while working.

Wash hands before work breaks and after finishing work.

### 7.2. Conditions for safe storage, including any incompatibilities

Refer to Technical Data Sheet

## 7.3. Specific end use(s)

Anaerobic

# **SECTION 8: Exposure controls/personal protection**

# 8.1. Control parameters

# **Occupational Exposure Limits**

Valid for

Great Britain

effects

### **Biological Exposure Indices:**

None

#### 8.2. Exposure controls:

Engineering controls:

Ensure good ventilation/extraction.

Respiratory protection:

Ensure adequate ventilation.

An approved mask or respirator fitted with an organic vapour cartridge should be worn if the product is used in a poorly

ventilated area

Filter type: A (EN 14387)

#### Hand protection:

Chemical-resistant protective gloves (EN 374).

Suitable materials for short-term contact or splashes (recommended: at least protection index 2, corresponding to > 30 minutes permeation time as per EN 374):

nitrile rubber (NBR;  $\geq$ = 0.4 mm thickness)

Suitable materials for longer, direct contact (recommended: protection index 6, corresponding to > 480 minutes permeation time as per EN 374):

nitrile rubber (NBR;  $\geq$  0.4 mm thickness)

This information is based on literature references and on information provided by glove manufacturers, or is derived by analogy with similar substances. Please note that in practice the working life of chemical-resistant protective gloves may be considerably shorter than the permeation time determined in accordance with EN 374 as a result of the many influencing factors (e.g. temperature). If signs of wear and tear are noticed then the gloves should be replaced.

#### Eye protection:

Safety glasses with sideshields or chemical safety goggles should be worn if there is a risk of splashing. Protective eye equipment should conform to EN166.

#### Skin protection:

Wear suitable protective clothing.

Protective clothing should conform to EN 14605 for liquid splashes or to EN 13982 for dusts.

Advices to personal protection equipment:

The information provided on personal protective equipment is for guidance purposes only. A full risk assessment should be conducted prior to using this product to determine the appropriate personal protective equipment to suit local conditions. Personal protective equipment should conform to the relevant EN standard.

### **SECTION 9: Physical and chemical properties**

## 9.1. Information on basic physical and chemical properties

Appearance paste paste liqui

paste, liquid white

Odor slightly

Odour threshold No data available / Not applicable

pH Not applicable

No data available / Not applicable Melting point No data available / Not applicable Solidification temperature Initial boiling point No data available / Not applicable Flash point > 93 °C (> 199.4 °F); no method No data available / Not applicable Evaporation rate Flammability No data available / Not applicable Explosive limits No data available / Not applicable Vapour pressure No data available / Not applicable Relative vapour density: No data available / Not applicable Density

#### 9.2. Other information

No data available / Not applicable

# **SECTION 10: Stability and reactivity**

#### 10.1. Reactivity

Peroxides.

#### 10.2. Chemical stability

Stable under recommended storage conditions.

### 10.3. Possibility of hazardous reactions

See section reactivity

#### 10.4. Conditions to avoid

No decomposition if used according to specifications.

#### 10.5. Incompatible materials

See section reactivity.

#### 10.6. Hazardous decomposition products

carbon oxides.

## **SECTION 11: Toxicological information**

## General toxicological information:

Prolonged or repeated contact may cause skin irritation.

## 11.1. Information on toxicological effects

### Acute oral toxicity:

The mixture is classified based on calculation method referring to the classified substances present in the mixture.

| Hazardous substances | Value | Value         | Species | Method   |
|----------------------|-------|---------------|---------|--|
| CAS-No.              | type  |               |         |  |
| Octan-1-ol           | LD50  | > 5.000 mg/kg | rat     | OECD Guideline 401 (Acute Oral Toxicity)             |
| 111-87-5             |       |               |         |  |
| Titanium dioxide     | LD50  | > 5.000 mg/kg | rat     | OECD Guideline 425 (Acute Oral Toxicity: Up-and-Down |
| 13463-67-7           |       |               |         | Procedure)   |
| Cumene hydroperoxide | LD50  | 382 mg/kg     | rat     | other guideline:                                     |
| 80-15-9              |       |               |         |  |
| Linalool             | LD50  | 2.790 mg/kg   | rat     | OECD Guideline 401 (Acute Oral Toxicity)             |
| 78-70-6              |       |               |         |  |

## Acute dermal toxicity:

The mixture is classified based on calculation method referring to the classified substances present in the mixture.

| Hazardous substances | Value    | Value         | Species | Method                                     |
|----------------------|----------|---------------|---------|--|
| CAS-No.              | type     |               |         |  |
| Octan-1-ol           | LD50     | 2.000 - 4.000 | rabbit  |  |
| 111-87-5             |          | mg/kg         |         |  |
| Octan-1-ol           | Acute    | 2.500 mg/kg   |         | Expert judgement                           |
| 111-87-5             | toxicity |               |         |  |
|                      | estimate |               |         |  |
|                      | (ATE)    |               |         |  |
| Titanium dioxide     | LD50     | >= 10.000     | hamster | not specified                              |
| 13463-67-7           |          | mg/kg         |         |  |
| Cumene hydroperoxide | LD50     | 530 - 1.060   | rat     | other guideline:                           |
| 80-15-9              |          | mg/kg         |         |  |
| Cumene hydroperoxide | Acute    | 1.100 mg/kg   |         | Expert judgement                           |
| 80-15-9              | toxicity |               |         |  |
|                      | estimate |               |         |  |
|                      | (ATE)    |               |         |  |
| Linalool             | LD50     | 5.610 mg/kg   | rabbit  | OECD Guideline 402 (Acute Dermal Toxicity) |
| 78-70-6              |          |               |         |  |

### Acute inhalative toxicity:

The mixture is classified based on calculation method referring to the classified substances present in the mixture.

| Hazardous substances CAS-No.   | Value<br>type | Value       | Test atmosphere | Exposure time | Species | Method        |
|--------------------------------|---------------|-------------|-----------------|---------------|---------|---------------|
| Titanium dioxide<br>13463-67-7 | LC50          | > 6,82 mg/l | dust            | 4 h           | rat     | not specified |
| Cumene hydroperoxide 80-15-9   | LC50          | 1,370 mg/l  | vapour          | 4 h           | rat     | not specified |

#### Skin corrosion/irritation:

The mixture is classified based on calculation method referring to the classified substances present in the mixture.

| Hazardous substances | Result         | Exposure | Species | Method   |
|----------------------|----------------|----------|---------|--|
| CAS-No.              |                | time     |         |  |
| Octan-1-ol           | slightly       | 4 h      | rabbit  | OECD Guideline 404 (Acute Dermal Irritation / Corrosion) |
| 111-87-5             | irritating     |          |         |  |
| Titanium dioxide     | not irritating | 4 h      | rabbit  | equivalent or similar to OECD Guideline 404 (Acute       |
| 13463-67-7           |                |          |         | Dermal Irritation / Corrosion)                           |
| Cumene hydroperoxide | corrosive      |          | rabbit  | Draize Test  |
| 80-15-9              |                |          |         |  |
| Linalool             | irritating     | 4 h      | rabbit  | OECD Guideline 404 (Acute Dermal Irritation / Corrosion) |
| 78-70-6              |                |          |         |  |

## Serious eye damage/irritation:

The mixture is classified based on calculation method referring to the classified substances present in the mixture.

| Hazardous substances | Result         | Exposure | Species | Method  |
|----------------------|----------------|----------|---------|---|
| CAS-No.              |                | time     |         |   |
| Octan-1-ol           | irritating     |          | rabbit  | OECD Guideline 405 (Acute Eye Irritation / Corrosion) |
| 111-87-5             |                |          |         |   |
| Titanium dioxide     | not irritating |          | rabbit  | OECD Guideline 405 (Acute Eye Irritation / Corrosion) |
| 13463-67-7           |                |          |         |   |
| Linalool             | irritating     |          | rabbit  | OECD Guideline 405 (Acute Eye Irritation / Corrosion) |
| 78-70-6              |                |          |         |   |

# Respiratory or skin sensitization:

The mixture is classified based on threshold limits referring to the classified substances present in the mixture.

| Hazardous substances<br>CAS-No. | Result          | Test type                          | Species    | Method   |
|---------------------------------|-----------------|------------------------------------|------------|--|
| Octan-1-ol<br>111-87-5          | not sensitising | Draize Test                        | guinea pig | Draize Test  |
| Titanium dioxide<br>13463-67-7  | not sensitising | Mouse local lymphnode assay (LLNA) | mouse      | equivalent or similar to OECD Guideline<br>429 (Skin Sensitisation: Local Lymph<br>Node Assay) |
| Linalool<br>78-70-6             | sensitising     | Mouse local lymphnode assay (LLNA) | mouse      | OECD Guideline 429 (Skin Sensitisation:<br>Local Lymph Node Assay)                             |

# Germ cell mutagenicity:

The mixture is classified based on threshold limits referring to the classified substances present in the mixture.

| Hazardous substances CAS-No.   | Result   | Type of study /<br>Route of<br>administration          | Metabolic<br>activation /<br>Exposure time | Species | Method  |
|--------------------------------|----------|--|--|---------|---|
| Octan-1-ol<br>111-87-5         | negative | bacterial reverse<br>mutation assay (e.g<br>Ames test) | with and without                           |         | equivalent or similar to OECD<br>Guideline 471 (Bacterial<br>Reverse Mutation Assay)              |
| Octan-1-ol<br>111-87-5         | negative | mammalian cell<br>gene mutation assay                  | with and without                           |         | equivalent or similar to OECD<br>Guideline 476 (In vitro<br>Mammalian Cell Gene<br>Mutation Test) |
| Titanium dioxide<br>13463-67-7 | negative | bacterial reverse<br>mutation assay (e.g<br>Ames test) | with and without                           |         | OECD Guideline 471<br>(Bacterial Reverse Mutation<br>Assay)                                       |

## Aspiration hazard:

No data available.

# **SECTION 12: Ecological information**

## General ecological information:

Do not empty into drains / surface water / ground water.

## 12.1. Toxicity

## **Toxicity (Fish):**

The mixture is classified based on calculation method referring to the classified substances present in the mixture.

| Hazardous substances | Value | Value            | Exposure time | Species                    | Method                    |
|----------------------|-------|------------------|---------------|----------------------------|---------------------------|
| CAS-No.              | type  |                  |               |                            |                           |
| Octan-1-ol           | LC50  | 13,3 mg/l        | 96 h          | Pimephales promelas        | OECD Guideline 203 (Fish, |
| 111-87-5             |       |                  |               |                            | Acute Toxicity Test)      |
| Titanium dioxide     | LC50  | Toxicity > Water | 48 h          | Leuciscus idus             | OECD Guideline 203 (Fish, |
| 13463-67-7           |       | solubility       |               |                            | Acute Toxicity Test)      |
| Cumene hydroperoxide | LC50  | 3,9 mg/l         | 96 h          | Oncorhynchus mykiss        | OECD Guideline 203 (Fish, |
| 80-15-9              |       |                  |               |                            | Acute Toxicity Test)      |
| Linalool             | LC50  | 27,8 mg/l        | 96 h          | Salmo gairdneri (new name: | OECD Guideline 203 (Fish, |
| 78-70-6              |       | -                |               | Oncorhynchus mykiss)       | Acute Toxicity Test)      |

### Toxicity (Daphnia):

The mixture is classified based on calculation method referring to the classified substances present in the mixture.

| Hazardous substances CAS-No.    | Value<br>type | Value                       | Exposure time | Species       | Method   |
|---------------------------------|---------------|-----------------------------|---------------|---------------|--|
| Octan-1-ol<br>111-87-5          | EC50          | 47 mg/l                     | 24 h          | Daphnia magna | OECD Guideline 202<br>(Daphnia sp. Acute<br>Immobilisation Test) |
| Titanium dioxide<br>13463-67-7  | EC50          | Toxicity > Water solubility | 48 h          | Daphnia magna | OECD Guideline 202<br>(Daphnia sp. Acute<br>Immobilisation Test) |
| Cumene hydroperoxide<br>80-15-9 | EC50          | 18,84 mg/l                  | 48 h          | Daphnia magna | OECD Guideline 202<br>(Daphnia sp. Acute<br>Immobilisation Test) |
| Linalool<br>78-70-6             | EC50          | 59 mg/l                     | 48 h          | Daphnia magna | OECD Guideline 202<br>(Daphnia sp. Acute<br>Immobilisation Test) |

## Chronic toxicity to aquatic invertebrates

The mixture is classified based on calculation method referring to the classified substances present in the mixture.

| Hazardous substances | Value | Value  | Exposure time | Species       | Method                    |
|----------------------|-------|--------|---------------|---------------|---------------------------|
| CAS-No.              | type  |        |               |               |                           |
| Octan-1-ol           | NOEC  | 1 mg/l | 21 d          | Daphnia magna | OECD 211 (Daphnia         |
| 111-87-5             |       |        |               |               | magna, Reproduction Test) |

### Toxicity (Algae):

The mixture is classified based on calculation method referring to the classified substances present in the mixture.

| Hazardous substances<br>CAS-No. | Value<br>type | Value                       | Exposure time | Species   | Method   |
|---------------------------------|---------------|-----------------------------|---------------|---|--|
| Octan-1-ol<br>111-87-5          | EC10          | 4,2 mg/l                    | 48 h          | Scenedesmus subspicatus (new name: Desmodesmus subspicatus)         | DIN 38412-09   |
| Octan-1-ol<br>111-87-5          | EC50          | 14 mg/l                     | 48 h          | Scenedesmus subspicatus (new name: Desmodesmus subspicatus)         | DIN 38412-09   |
| Titanium dioxide<br>13463-67-7  | EC50          | Toxicity > Water solubility | 72 h          | Pseudokirchneriella subcapitata                                     | OECD Guideline 201 (Alga, Growth Inhibition Test)    |
| Cumene hydroperoxide 80-15-9    | EC50          | 3,1 mg/l                    | 72 h          | Desmodesmus subspicatus<br>(reported as Scenedesmus<br>subspicatus) | OECD Guideline 201 (Alga,<br>Growth Inhibition Test) |
| Cumene hydroperoxide<br>80-15-9 | NOEC          | 1 mg/l                      | 72 h          | Desmodesmus subspicatus<br>(reported as Scenedesmus<br>subspicatus) | OECD Guideline 201 (Alga,<br>Growth Inhibition Test) |
| Linalool<br>78-70-6             | EC50          | 88,3 mg/l                   | 96 h          | Scenedesmus subspicatus (new name: Desmodesmus subspicatus)         | OECD Guideline 201 (Alga,<br>Growth Inhibition Test) |
| Linalool<br>78-70-6             | EC10          | 38,4 mg/l                   | 96 h          | Scenedesmus subspicatus (new name: Desmodesmus subspicatus)         | OECD Guideline 201 (Alga,<br>Growth Inhibition Test) |

## Toxicity to microorganisms

The mixture is classified based on calculation method referring to the classified substances present in the mixture.

| Hazardous substances           | Value | Value                       | Exposure time | Species                 | Method   |
|--------------------------------|-------|-----------------------------|---------------|-------------------------|--|
| CAS-No.                        | type  |                             |               |                         |  |
| Octan-1-ol<br>111-87-5         | EC 50 | 350 mg/l                    | 3 h           | activated sludge        | OECD Guideline 209<br>(Activated Sludge,<br>Respiration Inhibition Test) |
| Titanium dioxide<br>13463-67-7 | EC0   | Toxicity > Water solubility | 24 h          | Pseudomonas fluorescens | DIN 38412, part 8<br>(Pseudomonas<br>Zellvermehrungshemm-<br>Test)       |
| Cumene hydroperoxide 80-15-9   | EC10  | 70 mg/l                     | 30 min        |                         | not specified  |
| Linalool<br>78-70-6            | EC0   | 100 mg/l                    | 3 h           |                         | OECD Guideline 209<br>(Activated Sludge,<br>Respiration Inhibition Test) |

# 12.2. Persistence and degradability

The product is not biodegradable.

| Hazardous substances<br>CAS-No. | Result                     | Test type | Degradability | Exposure time | Method   |
|---------------------------------|----------------------------|-----------|---------------|---------------|--|
| Octan-1-ol<br>111-87-5          | readily biodegradable      | aerobic   | 92 %          | 28 d          | OECD Guideline 310 (Ready<br>BiodegradabilityCO2 in Sealed<br>Vessels (Headspace Test) |
| Cumene hydroperoxide 80-15-9    | not readily biodegradable. | aerobic   | 3 %           | 28 d          | OECD Guideline 301 B (Ready<br>Biodegradability: CO2 Evolution<br>Test)                |
| Linalool<br>78-70-6             | readily biodegradable      | aerobic   | > 97,1 %      | 28 d          | OECD Guideline 301 B (Ready<br>Biodegradability: CO2 Evolution<br>Test)                |
| Linalool<br>78-70-6             | inherently biodegradable   |           | 100 %         | 13 d          | OECD Guideline 302 B (Inherent<br>biodegradability: Zahn-<br>Wellens/EMPA Test)        |

## 12.3. Bioaccumulative potential

| Hazardous substances | Bioconcentratio | Exposure time | Temperature | Species     | Method                          |
|----------------------|-----------------|---------------|-------------|-------------|---------------------------------|
| CAS-No.              | n factor (BCF)  |               |             |             |                                 |
| Cumene hydroperoxide | 9,1             |               |             | calculation | OECD Guideline 305              |
| 80-15-9              |                 |               |             |             | (Bioconcentration: Flow-through |
|                      |                 |               |             |             | Fish Test)                      |

#### 12.4. Mobility in soil

Cured adhesives are immobile.

| Hazardous substances<br>CAS-No. | LogPow | Temperature | Method   |
|---------------------------------|--------|-------------|--|
| Octan-1-ol                      | 3,5    | 23 °C       | OECD Guideline 117 (Partition Coefficient (n-octanol / water), HPLC  |
| 111-87-5                        |        |             | Method)  |
| Cumene hydroperoxide            | 1,6    | 25 °C       | OECD Guideline 117 (Partition Coefficient (n-octanol / water), HPLC  |
| 80-15-9                         |        |             | Method)  |
| Linalool                        | 3,1    | 25 °C       | OECD Guideline 107 (Partition Coefficient (n-octanol / water), Shake |
| 78-70-6                         |        |             | Flask Method)  |

#### 12.5. Results of PBT and vPvB assessment

| Hazardous substances | PBT / vPvB   |
|----------------------|--|
| CAS-No.              |  |
| Octan-1-ol           | Not fulfilling Persistent, Bioaccumulative and Toxic (PBT), very Persistent and very     |
| 111-87-5             | Bioaccumulative (vPvB) criteria.   |
| Titanium dioxide     | According to Annex XIII of regulation (EC) 1907/2006 a PBT and vPvB assessment shall not |
| 13463-67-7           | be conducted for inorganic substances.   |
| Cumene hydroperoxide | Not fulfilling Persistent, Bioaccumulative and Toxic (PBT), very Persistent and very     |
| 80-15-9              | Bioaccumulative (vPvB) criteria.   |
| Linalool             | Not fulfilling Persistent, Bioaccumulative and Toxic (PBT), very Persistent and very     |
| 78-70-6              | Bioaccumulative (vPvB) criteria.   |

### 12.6. Other adverse effects

No data available.

# **SECTION 13: Disposal considerations**

#### 13.1. Waste treatment methods

Product disposal:

Dispose of in accordance with local and national regulations.

Contribution of this product to waste is very insignificant in comparison to article in which it is used

Do not empty into drains / surface water / ground water.

#### Disposal of uncleaned packages:

After use, tubes, cartons and bottles containing residual product should be disposed of as chemically contaminated waste in an authorised legal land fill site or incinerated.

Disposal must be made according to official regulations.

## Waste code

08 04 09\* waste adhesives and sealants containing organic solvents and other dangerous substances

The valid EWC waste code numbers are source-related. The manufacturer is therefore unable to specify EWC waste codes for the articles or products used in the various sectors. The EWC codes listed are intended as a recommendation for users. We will be happy to advise you.

## **SECTION 14: Transport information**

### 14.1. UN number

| ADR  | Not dangerous goods |
|------|---------------------|
| RID  | Not dangerous goods |
| ADN  | Not dangerous goods |
| IMDG | Not dangerous goods |
| IATA | Not dangerous goods |

# 14.2. UN proper shipping name

| Not dangerous goods |
|---------------------|
| Not dangerous goods |
|                     |

### 14.3. Transport hazard class(es)

| ADR  | Not dangerous goods |
|------|---------------------|
| RID  | Not dangerous goods |
| ADN  | Not dangerous goods |
| IMDG | Not dangerous goods |
| IATA | Not dangerous goods |

## 14.4. Packing group

| ADR  | Not dangerous goods |
|------|---------------------|
| RID  | Not dangerous goods |
| ADN  | Not dangerous goods |
| IMDG | Not dangerous goods |
| IATA | Not dangerous goods |

## 14.5. Environmental hazards

| ADR  | not applicable |
|------|----------------|
|      |                |
| RID  | not applicable |
| ADN  | not applicable |
| IMDG | not applicable |
| IATA | not applicable |

#### 14.6. Special precautions for user

| ADR  | not applicable |
|------|----------------|
| RID  | not applicable |
| ADN  | not applicable |
| IMDG | not applicable |
| IATA | not applicable |

## 14.7. Transport in bulk according to Annex II of Marpol and the IBC Code

not applicable

# **SECTION 15: Regulatory information**

## $15.1.\ Safety, health\ and\ environmental\ regulations/legislation\ specific\ for\ the\ substance\ or\ mixture$

Ozone Depleting Substance (ODS) (Regulation (EC) No 1005/2009): Not applicable Prior Informed Consent (PIC) (Regulation (EU) No 649/2012): Not applicable Persistent organic pollutants (Regulation (EU) 2019/1021): Not applicable

EU. REACH, Annex XVII, Marketing and Use Restrictions (Regulation 1907/2006/EC): Not applicable

VOC content (2010/75/EC)

< 3 %

#### 15.2. Chemical safety assessment

A chemical safety assessment has not been carried out.

#### **SECTION 16: Other information**

The labelling of the product is indicated in Section 2. The full text of all abbreviations indicated by codes in this safety data sheet are as follows:

H242 Heating may cause a fire.

H302 Harmful if swallowed.

H312 Harmful in contact with skin.

H314 Causes severe skin burns and eye damage.

H315 Causes skin irritation.

H317 May cause an allergic skin reaction.

H319 Causes serious eye irritation.

H330 Fatal if inhaled.

H351 Suspected of causing cancer.

H373 May cause damage to organs through prolonged or repeated exposure.

H411 Toxic to aquatic life with long lasting effects.

H412 Harmful to aquatic life with long lasting effects.

#### **Further information:**

This Safety Data Sheet has been produced for sales from Henkel to parties purchasing from Henkel, is based on Regulation (EC) No 1907/2006 and provides information in accordance with applicable regulations of the European Union only. In that respect, no statement, warranty or representation of any kind is given as to compliance with any statutory laws or regulations of any other jurisdiction or territory other than the European Union. When exporting to territories other than the European Union, please consult with the respective Safety Data Sheet of the concerned territory to ensure compliance or liaise with Henkel's Product Safety and Regulatory Affairs Department (ua-productsafety.de@henkel.com) prior to export to other territories than the European Union.

This information is based on our current level of knowledge and relates to the product in the state in which it is delivered. It is intended to describe our products from the point of view of safety requirements and is not intended to guarantee any particular properties.

#### Dear Customer,

Henkel is committed to creating a sustainable future by promoting opportunities along the entire value chain. If you would like to contribute by switching from a paper to the electronic version of SDS, please contact the local Customer Service representative. We recommend to use a non-personal email address (e.g. SDS@your\_company.com).

Relevant changes in this safety data sheet are indicated by vertical lines at the left margin in the body of this document. Corresponding text is displayed in a different color on shadowed fields.
