

3M™ Sealed-Seam Respirator Hood H-610-5, Collar, 5 EA/Case

3M ID 70070845824, UPC 50051138765502

Specifications

Brand	3M™
Case Quantity	5
Color Family	White
Compatible With	3M™ Hood Assembly H-613
Headgear Type	Hood
High Heat	No
Market	Aerospace, Defense, Homeland Security
National Stock Number	4240014791175
Product Color	White
Product Type	Headgear
Recommended Application	Assembly and Mechanical, Cleaning, Painting
Segment	Personal Safety
Size	Standard
Visor Type	Clear

Details

- Hood with US OSHA APF of 1000
- Sealed-seam hood

This lightweight, comfortable respirator hood helps provide head, neck and respiratory protection from pesticide and chemical overspray, lightweight, loose fitting, for use with belt-mounted powered air purifying respirators or supplied air components.

Replacement respirator hood for 3M™ Hood Assemblies H-611 and H-612.

Powered Air Purifying Respirators (PAPR) are motorized systems powered by a battery pack which draw air through a filter or cartridge to provide respiratory protection to the wearer. The blower unit can be mounted on the waist, face, or head, depending on the system selected. Potential benefits include:

- Certain PAPR systems provide a higher level of respiratory protection than non-powered air filtering respirators
- Constant flow of air can provide cooling for the worker, resulting in greater comfort for the wearer
- Loose-fitting headgear options provide respiratory protection without the need for a tight faceseal or fit testing
- Battery-powered blower pulls the air through the filter resulting in no additional breathing resistance to the wearer.
