Order no.: 43631

Article number: 590T601

EAN: 4010995436315

Customs tariff number: 84672920

Protects your health: Recommended by doctors and therapists at German Campaign for Healthier Backs.

Increases your control: Fixing by hand with a deft touch.

Protects your material: Electric screw fastening with protection function to prevent damage to materials (max. 0.4 Nm).

Increases your speed: Work twice as fast thanks to three-step process.

Application: Ideal tool for all screw fastening tasks in machining and industry, such as industrial maintenance and installation, motorised equipment maintenance and repair, heating, climate control and plumbing installations, and bicycle and motor bike repair.

Anyone who spends much of their day fastening screws knows how much time it takes and the considerable strain it causes to wrists in the long run. With the world's first e-screwdriver speedE® by Wiha, such problems become a thing of the past once and for all. The speedE® allows you to fasten screws twice as fast as with a conventional screwdriver and still have full control over the tightening force thanks to the material protection function. On reaching 0.4 Nm, the power-assisted fastening switches off automatically to protect the material and users can finish tightening screws carefully by hand using up to a maximum of 8 Nm. Thanks to its electric ratchet function and award-winning SoftFinish® handle shape, the speedE® noticeably reduces strain on joints, tendons and muscles. It is recommended by German doctors and therapists at German Campaign for Healthier Backs for this very reason. The integrated LED light shines directly onto the screw and work piece that the user is working on. The e-screwdriver improves everyday efficiency, thanks especially to its compact design. At least 500 screws can be fastened when its standard 18500 rechargeable battery is fully charged. It can also handle numerous different screw profiles when used in combination with the speedE® Industrial bit holder and Wiha standard bits.

The speedE® Industrial bit holder is designed for use with the speedE® Industrial and not for machine operation.

Content:

- 1x E-screwdriver handle speedE®
- 1x Bit holder with 50 mm bit T20
- 1x 18500 Li-Ion battery
- 1x speedE charging cradle
