

Icebreaker, 32 pieces

Limited Editions - when they're gone, they're gone

EAN:	4013288221100	Size:	0x0x0 mm
Part number:	05134023001	Weight:	0 g
Article number:	Eisbrecher	Country of origin:	CZ
		Customs tariff number:	82054000

- Promotional set with 30 Stainless tools for the most common applications
- Completely suitable for industrial use. All Wera Stainless tools are vacuum ice hardened and therefore have the required hardness and strength properties
- With robust ice scraper by the Finnish specialist KUNGS® - in a Tool Rebel mitten
- Screwdrivers (TORX® as well as slotted, Philips-head Phillips and Pozidriv with Lasertip tip for better hold on the screw head), L-keys (Hex-Plus reduces the cylindrical turning of hexagonal socket screws), bits, bit holder and iconic Wera bottle opener
- Also makes a great Christmas present

This tool set is not only an icebreaker, it also hits the nail on the head. 32-piece tool set with a special extra for freezing winter nights: one original KUNGS® ice scraper with a warm mitten in the Tool Rebel design. It will let you break stubborn ice on small and large panes and you will be the proud owner of a well sought-after item. With Stainless tools, coming out of the cold, thanks to their vacuum ice hardening, and therefore completely suitable for industrial use and even prevent extraneous rust: 11 screwdrivers, 9 L-keys for exagonal socket screws, 9 bits and a Rapidaptor bit holder. Of course, a must and also included is the ice-blue bottle opener: Skål!

Limited Editions - when they're gone, they're gone

Tool Rebel glove with ice scraper

With the KUNGS® ice scraper on the Tool Rebel glove, ice is removed effectively without damaging the surface. The glove keeps your hands warm even in sub-zero temperatures.

Screw stainless steel together with stainless steel!

Solution to the rust problem: screw stainless steel together with stainless steel! Wera stainless steel tools are manufactured out of stainless steel so unsightly rust can be avoided.

Hex-Plus

Hexagon socket screws are a problem, because the contact surfaces that transfer the force of the tool to the screw are very narrow. The consequence: the head of the screw can be damaged, usually rounding out the recess. Hex-Plus tools have larger contact surfaces to prevent this, driving from the flats of the recess, rather than the corners. Good to know: Hex-Plus tools fit into every standard hexagon socket screw!

Secure hold and easy removal

The wear-resistant clip material ensures that the L-keys are securely held yet are easy to remove.

Stainless Steel Bits

Wera stainless steel bits are manufactured out of stainless steel so unsightly rust can be avoided. The stainless steel bits from Wera are vacuum ice-hardened and have the hardness and strength needed for screw connections. There are no limitations to the industrial applications they are suitable for.

At the workplace

The Bit-Checks can be positioned upright at the workplace so the tool is always quickly to hand.

"Take it easy" Tool Finder

Screwdrivers with "Take it easy" tool finder: colour coding according to profile and size stamp.
