- Multi-component ergonomic handle
- Vacuum ice tempered bits made of stainless steel prevent extraneous rust
- The magnet holds the bit securely in the bit mounting
- Bit hand-holder with bit mounting
- In an advertising-free Christmas box - the ideal present

5-piece stainless steel set with hand-holder and blades in a Christmasy gift wrapping. The Kraftform handle of the hand-holder stands for comfortable ergonomic screwdriving, which avoids blisters and calluses. Hard handle zones for high working speeds, while soft handle zones guarantee a high torque transfer. Wera's stainless steel tools are vacuum ice tempered and therefore have the hardness and strength properties required for screw connections. The hexagon anti-roll protection avoids bits from rolling away annoyingly at the workplace.

3867/1 TS TORX®

05071033001 1 x TX 15 x 25 mm
05071034001 1 x TX 20 x 25 mm

Screw stainless steel together with stainless steel!

Solution to the rust problem: screw stainless steel together with stainless steel! Wera stainless steel tools are manufactured out of stainless steel so unsightly rust can be avoided.

Torsion bits

Torsion bits absorb the damaging peak torque loads in the torsion zone. This prevents premature wear and enhances the service life of the bits.

Prevents hand injuries

The outstanding design of the Kraftform handle that fits perfectly into the hand prevents hand injuries such as blisters and calluses.
