

Purpose of notification: New marking process

Type of notification: Minor change, for informational notice only

Detailed Description:

To ensure highest flexibility and also offer new possibilities in product marking design as well as increase the production throughput, a new product marking technology was carefully evaluated. The tool based and therefor unflexible pad print process will be replaced by using digital printing, that offers highest flexibility and maximum bandwith by keeping best readability, robustness and resistance of the print.

This change has been thoroughly evaluated to ensure that there are no quality, reliability or functional implications to our customers.

Swissbit is not recommending additional qualification of these changes on platforms received from Swissbit.

There is no change to form fit or function, nor a change to Swissbit part numbers.

Based on availability, the smooth transition to the new marking technologies will begin.

Quality impact: No impact

Reliability impact: No impact

Product series affected:

d = drive capacity; g = generation, t = temperature grade E or I; x = configuration and options; z = standard or customer specific

Implementation date: Estimated September 2021, floating transition based on stock

Recommended action: No action required

IMPORTANT NOTE:

Swissbit – as a provider of industrial products – announces and informs about every change in the product hardware and firmware. We always test backwards compatibility and assure best quality, reliability and transparency for our customers.

We apologize for any inconvenience caused.

This Minor Change PCN serves as an informational notice and is an optional information in accordance with JEDEC J-STD-046.
