-----------------------------	-----------	-------	-------------

Comments:	Design change
-----------	---------------

Affected products:	NAC3FPX-ST-TOP
--------------------	----------------

First shipment of modified product:	O37
-------------------------------------	-----

## Engineering Change Notice

The breach in the chassis has been removed (circled below). The Neutrik logo is now embedded directly in the front cover. The major advantage of this change is an even better sealing of the product.

*breakthrough of logo from the back*

*logo now embedded in the front*
