Air-Actuated Valve, 316L Stainless Steel, **Normally Closed**

The AAV-1100 Series of airoperated stainless steel angle seat valves are ideal for use in a wide range of industrial applications. The unique construction permits the use of these valves with a wide range of fluids including

steam, select liquids and gases, and vacuum. The valve stem has a self-aligning gland which together with the floating seal assures maximum integrity. The PTFE seal material is used as standard for maximum fluid compatibility.

Media Temperature: -10 to 180°C

(14 to 360°F)

Ambient Temperature: -10 to 60°C

(14 to 140°F)

Body Material: Stainless steel

AISI 316L

Seal Material: PTFE

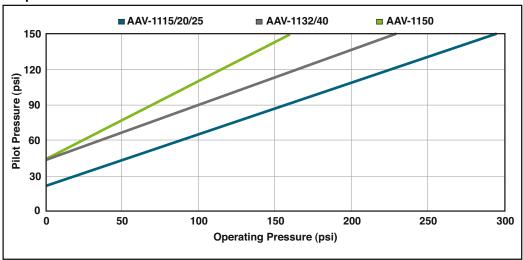

Pilot Media: Air, inert gases, water,

maximum 60°C (140°F)

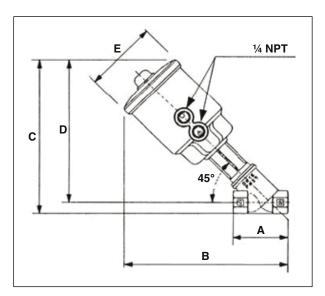

Valve Position: Normally closed Flow Direction: 2 -> 1 over seat

To order units with BSPP threads add suffix "-BSPP" to the model number, no additional cost.

Comes complete with operator's manual (actuator valve sold separately).

^{*} Maximum pressure with steam is limited to 150 psig.
